#### 1.0 SUMMARY

This Phase I Environmental Site Assessment (Phase I ESA) was conducted to identify recognized environmental conditions (RECs), historical RECs, and de minimis conditions associated with a 2.806-acre site (the Property), located at Columbus, Meeting, and Line Streets in Charleston, Charleston County, South Carolina. Its' intent is to fulfill certain due diligence requirements of the innocent landowner defense, contiguous owner defense, and bona fide prospective purchaser clause of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

The Property consists of a four parcels totaling approximately 2.806-acres (Charleston County Tax Map Series Number 459-05-03-115, -118, -124, and -133).

The Phase I ESA notes the following:

- The Property consists of four parcels located on Columbus, Line, and Meeting
  Streets in Charleston, South Carolina. The southern parcels of the Property are
  mostly asphalt-paved. The southeastern parcel is leased by a construction company
  for equipment and material storage. The southwestern parcel is used by adjacent
  businesses as a parking lot. The northern parcels are undeveloped and grassed.
- The Property is generally bound to the north by the Carlson Court right-of-way, residences, Pizza Hut, Line Street, and a storage facility; to the south by a Piggly Wiggly grocery store; to the east by Meeting Street and various retail businesses; and to the west by a railroad right-of-way and the Post & Courier Facility.
- A review of Charleston City Directories and Sanborn Fire Insurance maps identified that the Arctic Ice and Coal Company was previously located on the southwest portion of the Property. Based on the likelihood of handling chemicals of concern (COCs), the former Arctic Ice and Coal Company is an onsite REC.
- The Property was previously developed with the Packet Motor Lines and subsequently, Watkins Motor Lines. Multiple onsite RECs were identified in association with this previous development, including a former truck washing area, a former truck maintenance garage, an inactive oil/water separator, and four underground petroleum storage tanks (USTs).
- The western adjacent property is developed with a railroad right-of-way. Fuels used to power trains typically contain metals and polynuclear aromatic hydrocarbons (PAHs). Furthermore, railroad ties are pressure treated with creosote or metal-

containing wood preservatives as a means of reducing rot and extending service life. Consequently, railroad ties commonly contain metals and/or PAHs. These COCs are sometimes elevated above surrounding background concentrations in the surface soils in the immediate area of a rail line; thus, the railroad right-of-way represents an offsite REC. However, PAHs often occur in urbanized areas as a result of a variety of anthropogenic sources in addition to railroads.

- Charleston City Directories and Sanborn Fire Insurance maps identify several offsite facilities in the proximity of the Property that likely handled COCs. These facilities include the former King Street Shell Station located at the intersection of King and Columbus Streets, two Southern Railroad Car Shops previously located on Line and Columbus Streets, the Charleston Dry Cleaning Company located on Columbus Street, and the Southern Railroad right-of-way located on the western adjacent property. Each of these facilities represents an offsite REC.
- Several offsite facilities are identified in various regulatory databases. However, none of the identified facilities represent offsite RECs based on their regulatory status, distance from the Property, and/or direction of groundwater flow.
- GEL recommends that the onsite soils be assessed in the areas of the identified onsite RECs, as well as the collection of groundwater samples on the Property to determine if COCs are present from the onsite and offsite RECs.
- GEL also recommends the proper excavation and disposal of the four USTs identified on the Property to simplify future site redevelopment.

#### 2.0 INTRODUCTION

#### 2.1 Purpose

Ms. Christine Durant of Charleston County requested that GEL Engineering, LLC (GEL) conduct a Phase I ESA for a four parcels owned by the Evening Post and Publishing Company and located on Columbia, Meeting, and Line Streets in Charleston, Charleston County, South Carolina (the Property). The purpose of this Phase I ESA was to evaluate the Property, and to a more limited scope surrounding properties, for the presence or absence of RECs, historical RECs, and/or de minimis conditions.

A recognized environmental condition (REC) is described by American Society for Testing and Materials (ASTM) Standard E 1527-05 as: the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. A historical recognized environmental condition is described by the ASTM Standard as: an environmental condition which in the past would have been considered a

recognized environmental condition, but which may or may not be considered a recognized environmental condition currently. According to the Standard, *de minimis conditions*: generally do not present a material risk of harm to public health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

#### 2.2 Detailed Scope of Services

GEL has performed a Phase I ESA in accordance with Contract No. 4573 between GEL Engineering, LLC and the County of Charleston (Charleston), dated January 9, 2012. These services have been performed in general accordance with ASTM Standard E 1527-05 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," and in general accordance with 40 CFR Part 312 - "Standards and Practices for All Appropriate Inquiries." Any deletions and/or additional services that deviate from these standards are described within Sections 12.0 and 13.0. These standards do not include investigation into all areas of local, state, tribal, and federal environmental requirements. These requirements were not addressed within this report and GEL is not responsible for other legal obligations for noncompliance with regulations not addressed specifically herein.

#### 2.3 Significant Assumptions

Our findings and opinions are based upon information provided to us by others and our Property observations and are subject to, and limited by, the "Standard Terms and Conditions" agreed upon by Charleston County and GEL. We have not verified the completeness or accuracy of the information provided by others, unless noted otherwise. Our observations were based upon conditions readily visible at the Property at the time of our visit and did not include services typically performed during an Environmental Compliance Audit or a Phase II ESA. If additional information becomes available that may affect our conclusions and/or recommendations, we request the opportunity to review the information, and reserve the right to modify our report, as warranted.

#### 2.4 Limitations and Exceptions

GEL, by virtue of providing the services described herein, does not assume the responsibility of the person(s) in charge of the Property or otherwise undertake responsibility for reporting to any local, state, or federal public agencies any conditions at the Property which may present a potential concern to public health, safety, or the environment. GEL understands that the client will notify the appropriate regulatory agencies as required.

The ASTM Standard does not address whether requirements in addition to *all appropriate inquiry* have been met in order to qualify for the Landowner Liability Protections (*LLPs*), for example, the duties specified in 42 U.S.C. §9607(b)(3)(a) and (b) including the continuing obligation not to impede the integrity and effectiveness of *activity and use limitations* (*AULs*),

or the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting obligations.

Performance to the ASTM Standard is intended to reduce, but not eliminate, uncertainty regarding the potential for *recognized environmental conditions* in connection with a *property*, and the ASTM Standard recognizes reasonable limits of time and cost. No *environmental site assessment* can wholly eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with a *property*.

Subject to the ASTM Standard, an *environmental site assessment* meeting or exceeding the ASTM Standard and completed less than 180 days prior to the date of acquisition of the *property* or, for transactions not involving an acquisition, the date of the intended transaction, is presumed to be valid.

#### 2.5 Special Terms and Conditions

This Phase I ESA was conducted in general conformance accordance with Contract No. 4573 between GEL Engineering, LLC and the County of Charleston (Charleston), dated January 9, 2012.

#### 2.6 User Reliance

This report has been prepared for the exclusive use of Charleston County and the Post & Courier solely for their use and reliance, subject to the terms and conditions agreed upon between GEL and Charleston County for this specific project. These services have been provided in accordance with generally accepted environmental practices. No other warranty, expressed or implied, is made. The contents of this report should not be construed in any way to indicate GEL's recommendation to purchase, sell, or further develop the Property. Reliance on this report cannot be transferred without the written permission of Charleston County and GEL, and only if the other party agrees to the "Standard Terms and Conditions" agreed upon for this project. A copy of the standard Terms and conditions are included in Appendix 19.1.

#### 3.0 SUBJECT SITE DESCRIPTION

#### 3.1 Location and Legal Description

The Property consists of four parcels (Charleston County TMS No. 459-05-03-115, -118, -124, and -133) and is located in the general area of Columbus, Meeting, and Line Streets in Charleston, Charleston County, South Carolina. The legal description of the parcels are as follows: Parcel -115 is N Addison St 4 Lt 2; Parcel -118 is Lt3,4,5 & Pt 6; Parcel -124 is Lettered A B C D E F G H A; and Parcels -133 is SCTC 132311-000 ASMT Included In Personal Property.

The General Use of all parcels is vacant commercial (VCC) and the general coordinates of the Property are: 32° 47′ 42.36″ N, 79° 56′ 26.52″ W.

#### 3.2 Property and Vicinity General Characteristics

As shown on Figure 1, an excerpt from the United States Geologic Survey (USGS) 7.5-minute quadrangle map of Charleston, South Carolina and dated 1979, the Property consists of three vacant lots and a parking lot located west of the intersections of Columbus, Line, and Meeting Streets. Surrounding properties primarily consist of residential, retail and commercial businesses.

#### 3.3 Current Use of the Property

The southeastern parcel of the Property is leased by a construction company for the storage of equipment and materials. The southwestern parcel is used by adjacent businesses as a parking lot. The northern parcels are grassed with no structures.

#### 3.4 Description of Structures, Roads, and Other Property Improvements

The Property is not currently developed with any structures. The northern parcels of the Property are grassed and undeveloped. The southeastern parcel at the intersection of Meeting and Columbus Streets contains two areas that were previously developed with structures. The former structure area in the western portion of this parcel contains a concrete pad and the fill-covers for four USTs. A chain-link fence surrounds a majority of the southern two parcels of the Property. The southwestern parcel is used as a parking lot. Most of the remaining portions of the southern two parcels are asphalt-paved. These parcels are bordered by the Carlson Court road right-of-way to the north, Meeting Street to the east, Columbus Street to the south, and the Southern Railway right-of-way to the west.

Water and sewer are provided by the Charleston Water System and electricity is provided by South Carolina Electric and Gas.

#### 3.5 Current Uses of the Adjoining Properties

Adjoining properties were examined for conditions that represent existing or potential sources of environmental impact to the Property. The Property and surrounding properties are shown on Figure 2. A summary of the current adjoining properties is provided in the following table.

| Direction from<br>Property | Adjoining Property Uses   | Topographic relation to the Property | Existing or<br>Potential REC's<br>identified? |
|----------------------------|---|--------------------------------------|---|
| North                      | Residences; Pizza Hut; Line Street;<br>AAA Downtown Storage; Residences | Cross-gradient                       | No  |
| East                       | Meeting Street; Miscellaneous Retail and Commercial Businesses          | Down-gradient                        | No  |
| South                      | Columbus Street; Piggly Wiggly (grocery store)                          | Cross-gradient                       | No  |

| West | Railroad right-of-way; Post & Courier Facility | Up-gradient | Yes |
|------|--|-------------|-----|
|------|--|-------------|-----|

#### 4.0 USER PROVIDED INFORMATION

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must provide certain information, if available, to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

An interview was conducted in the form of a written User Questionnaire which was completed by Mr. Ron Owens of the Post and Courier. The completed User Questionnaire is attached as Appendix 19.2. Information provided by Mr. Owens is presented below in Sections 4.1 through 4.9.

#### 4.1 Title Records

A chain of title for the property was not provided by the client. A partial listing of prior owners of the Property can be obtained from the Charleston County, South Carolina government website (<a href="http://prcweb.charlestoncounty.org/">http://prcweb.charlestoncounty.org/</a>) and deeds on the Charleston County Register Mesne Conveyance website (<a href="http://www2.charlestoncounty.org/">http://www2.charlestoncounty.org/</a>). A summary of the ownership information is provided in the following tables.

| Parcel TMS No. 459-05-03-115 |   |    |  |  |
|------------------------------|---|----|--|--|
| Dates of Ownership           | Existing or Potential REC's Identified? |    |  |  |
| March 1954                   | Rachel Z. and Hannah G. Schwartz        | No |  |  |
| June 1963                    | Evening Post Publishing Company         | No |  |  |

| Parcel TMS No. 459-05-03-118 |                                 |   |  |  |
|------------------------------|---------------------------------|---|--|--|
| Dates of Ownership           | Property Owner                  | Existing or Potential REC's Identified? |  |  |
| October 1944                 | James Morris                    | No                                      |  |  |
| November 6, 1981             | Evening Post Publishing Company | No                                      |  |  |

| Parcel TMS No. 459-05-03-124 |                                 |   |  |
|------------------------------|---------------------------------|---|--|
| Dates of Ownership           | Property Owner                  | Existing or Potential REC's Identified? |  |
|                              | Evening Post Publishing Company | No                                      |  |

| Parcel TMS No. 459-05-03-133 |                                 |   |  |
|------------------------------|---------------------------------|---|--|
| Dates of Ownership           | Property Owner                  | Existing or Potential REC's Identified? |  |
|                              | Evening Post Publishing Company | No                                      |  |

Parcels 459-05-03-123 and -133 did not have dates for which the Evening Post Publishing Company began ownership. During on an interview with Tommy McGee, General Services Manager for owner, he stated that the Evening Post Publishing Company conducted extensive title searches prior to ownership and he believes that portions of the Property were Heirs Property (Appendix 19.8).

#### 4.2 Environmental Liens or Activity and Land Use Limitations

Mr. Owens was interviewed regarding actual knowledge of any environmental cleanup liens against the property or any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls, that are in place at the Property and/or that are filed or recorded under federal, tribal, state or local law. Mr. Owens responded that he was not aware of any environmental liens or AULs with respect to the Property.

#### 4.3 Specialized Knowledge

Mr. Owens was interviewed regarding his potential specialized knowledge or experience related to the Property or nearby properties. He responded that he did not have any specialized knowledge regarding the Property.

#### 4.4 Commonly Known or Reasonably Ascertainable Information

Mr. Owens was interviewed regarding his awareness of commonly known or reasonably ascertainable information about the Property, such as past uses or prior environmental conditions, that would help the environmental professional to identify conditions indicative of releases or threatened releases. Mr. Owens responded that he is aware of the past uses of the Property as a trucking terminal.

#### 4.5 Presence of Contamination

Mr. Owens was interviewed regarding, based on his knowledge and experience related to the property, any obvious indicators that point to the presence or likely presence of contamination at the Property. He responded that he has no knowledge or reason to assume contamination is present at the Property, but that fuel storage tanks are present on the Property.

#### 4.6 Valuation Reduction for Environmental Issues

Mr. Owens was interviewed regarding his knowledge of the purchase price being paid for the Property and if the purchase price reasonably reflected the fair market value of the Property. Mr. Owens stated that no determination has been made in relation to the purchase price.

#### 4.7 Owner, Property Manager, and Occupant Information

The owner, property manager, and occupants of the Property are listed below.

| Relation to<br>Property | Name        | Company Affiliation             |
|-------------------------|-------------|---------------------------------|
| Owner                   | na          | Evening Post Publishing Company |
| Property Manager        | Tommy McGee | Evening Post Publishing Company |

#### 4.8 Reason for Performing Phase I ESA

This Phase I ESA was conducted in order to understand potential environmental liabilities that would impact the Property and prepare the Property for sale or lease.

#### **4.9** Other

No additional environmental documents were provided to GEL for review.

#### 5.0 RECORDS REVIEW

Regulatory database information was provided by Environmental Data Resources, Inc. (EDR), a contract information services company. Information in this section is subject to the accuracy of the data provided by EDR and the date at which the information is updated. The scope described herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the terms "up-gradient, "cross-gradient," and "down-gradient" refer to the topographic gradient relative to the Site. The groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface.

#### **5.1 Standard Environmental Record Sources**

Publically available and practically reviewable federal and state environmental databases and records were reviewed to evaluate if environmental incidents have been reported at the Property or if properties with environmental liabilities are located in the vicinity of the Property. A detailed summary of federal and state databases prepared by Environmental Date Resources (EDR) is presented in Appendix 19.3. Federal and state regulatory databases have been researched and reported in accordance with the search radii specified by ASTM Standard E 1527-05.

The following table includes the approximate minimum search distances and a list of the databases reviewed. These databases were selected based on minimum requirements of ASTM

E 1527-05. The number of facilities indicates the number of regulated facilities identified by GEL to be present within the approximate minimum search distance for a particular database. The following table also includes additional databases, outside of the ASTM standards, as produced by EDR. Please note: some facilities are listed in more than one database.

| Database                       | Definition   | Search<br>Radius<br>(Miles)         | Listings |
|--------------------------------|--|-------------------------------------|----------|
|                                | <u>Federal</u>   |                                     |          |
| NPL                            | The NPL is the USEPA's database of uncontrolled or abandoned hazardous waste facilities that have been listed for priority remedial actions under the Superfund Program.   | 1.0                                 | 0        |
| NPL (Delisted)                 | The NPL (Delisted) refers to facilities that have been removed from the NPL.   | 0.5                                 | 0        |
| CERCLIS                        | The CERCLIS database is a compilation of facilities, which the USEPA has investigated or is currently investigating for a release or threatened release of hazardous substances pursuant to the CERCLA of 1980.  | 0.5                                 | 0        |
| CERCLIS/<br>NFRAP              | CERCLIS/NFRAP refers to facilities that have been removed and archived from USEPA's inventory of CERCLA sites.   | 1.0                                 | 0        |
| RCRA<br>CORRACTS /<br>TSD      | The USEPA maintains a database of RCRA facilities associated with treatment, storage, and disposal (TSD) of hazardous waste that are undergoing "corrective action." A corrective action order is issued when there has been a release of hazardous waste or constituents into the environment from a RCRA facility.   | 1.0                                 | 1        |
| RCRA Non-<br>CORRACTS /<br>TSD | The RCRA Non-CORRACTS/TSD database is a compilation by the USEPA of facilities, which report storage, transportation, treatment, or disposal of hazardous waste. Unlike the RCRA CORRACTS/TSD database, the RCRA Non-CORRACTS/TSD database does not include RCRA facilities where corrective action is required.   | 0.5                                 | 0        |
| RCRA<br>Generators             | The RCRA Generators database, maintained by the USEPA, lists facilities that generate hazardous waste as part of their normal business practices. Generators are listed as either large (LQG), small (SQG), or conditionally exempt (CESQG). LQGs produce at least 1,000 kilogram per month of non-acutely hazardous waste or 1 kilogram per month of non-acutely hazardous waste. SQGs produce between 100 – 1,000 kilograms per month of non-acutely hazardous waste. CESQGs are those that generate less than 100 kilograms per month of non-acutely hazardous waste. | Site and<br>Adjoining<br>Properties | 1        |

| Database    | Definition   | Search<br>Radius<br>(Miles)         | Listings |
|-------------|--|-------------------------------------|----------|
| IC / EC     | A listing of sites with institutional and/or engineering controls in place. ICs include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on-site. Deed restrictions are generally required as part of the institutional controls. ECs include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or affect human health. | Site                                | 0        |
| ERNS        | The ERNS database is a listing compiled by the USEPA on reported releases of petroleum and hazardous substances to the air, soil, and/or water.  | Site                                | 0        |
|             | <u>State</u>   |                                     |          |
| SHWS        | State and/or Tribal equivalent database of CERCLIS.  | 1.0                                 | 17       |
| SWF / LF    | State and/or Tribal database of solid waste disposal facilities or landfills in South Carolina.  | 0.5                                 | 0        |
| LUST        | State and/or Tribal database of leaking underground storage tanks in South Carolina.   | 0.5                                 | 21       |
| UST / AST   | State and/or Tribal database of registered storage tanks in South Carolina.  | Site and<br>Adjoining<br>Properties | 17       |
| RCR         | Registry of Conditional Remedies (RCR) is a registry of sites with conditional remedies such as land use controls and conditional no further actions   | 0.5                                 | 2        |
| DRYCLEANERS | State and/or Tribal database of drycleaner sites in South Carolina   | 0.25                                | 0        |
| VCP         | State and/or Tribal database of facilities included in the South Carolina's Voluntary Cleanup Program.   | 0.5                                 | 4        |
| Brownfields | State and/or Tribal database of Brownfields sites addressed cooperative agreement recipients or targeted Brownfields assessments.  | 0.5                                 | 4        |
|             | Additional Environmental Records   |                                     |          |
| DOD         | Database of Department of Defense Sites consisting of federally owned or administered lands equal or greater than 640-acrs that are administered by the Department of Defense.   | 1.0                                 | 0        |
| RCRA-NonGen | Database of RCRA sites that do not presently generate hazardous waste.   | 0.250                               | 3        |
| GWCI        | Groundwater Contamination Inventory (GWCI) is a database of all groundwater contamination cases in the state   | 0.5                                 | 8        |
| FINDS       | The Facility Index System database contains both facility information and "pointers" to additional sources containing more detail.   | Site                                | 0        |

| Database | Definition  | Search<br>Radius<br>(Miles) | Listings |
|----------|---|-----------------------------|----------|
| HMIRS    | Hazardous Materials Information Reporting System (HMIRS) – database containing hazardous material spill incidents reported to DOT | Site                        | 0        |

GEL reviewed the regulatory information provided in the database report to identify listed facilities located within the approximate minimum search distances. A section of unmappable sites is included in the EDR report. Unmappable, or orphan sites, are facilities that have not been geocoded due to a lack of specific location information provided by the regulatory agencies, but are known to be in the general area of the Property. The database report listed 47 "orphan" facilities (facilities that were not mapped in the database report due to poor or inadequate address information). Based upon GEL's area reconnaissance and knowledge of the area, none of the orphan facilities represent offsite RECs. The EDR report also includes a summary of Federal and State listed sites organized by zip code. A review of the Zip Code Summary did not identify any additional sites located in the vicinity of the Property.

The following table summarizes the site-specific information provided by EDR and/or gathered by GEL for identified facilities within one-quarter mile of the Property. A complete table summarizing the site-specific information provided by EDR is provided as a table in Appendix 19.3. Facilities are listed in order of proximity to the Site. Additional discussion for selected facilities follows the summary table.

#### Listed Facilities within One-Quarter Mile of the Property

| Name / Location                                | Approximate Distance / Direction /<br>Gradient | Database Listings                        |
|--|--|--|

| Chi Ghis<br>685 King St                                       | 0.216-miles / west-northwest / downgradient  | UST                                 |

#### **Evening Post Publishing Company**

The Evening Post Publishing Company was identified in the Resource Conservation and Recovery Act (RCRA) Conditionally Exempt Small Quantity Generator (CESQG), Facility Index System/Facility Registry System (FINDS), and Permitted Airs Facility Listing (AIRS) databases. The facility received notice of violations in 1984 and 1985. The facility achieved compliance for the two violations in 1985 and 1986, respectively. Based on its current regulatory status and lack of recently reported violations, the Evening Post Publishing Company does not represent an offsite REC.

#### Bennett's Exxon

Bennett's Exxon is located at 478 Meeting Street and is approximately 0.027-miles north-northeast of the Property. The facility is listed in the Underground Storage Tank (UST), Leaking UST (LUST), and Groundwater Contamination Inventory (GWCI) databases. A release was reported in 1985 and the facility was issued a letter of no further action (NFA) in 2005. Groundwater is reported to flow to the north, which is away from the Property. Therefore, based on its currently regulatory status and reported direction of groundwater flow, the Bennett's Exxon is not considered an offsite REC.

#### <u>U Haul Center King Street (U Haul)</u>

The U Haul facility is located approximately 0.084-miles south-southwest of the Property and is listed in the UST database. The facility reportedly contained five USTs; all of which were abandoned and removed from the ground in 1989 and 1992. No releases were reported from the USTs at the facility. Based on the lack of reported releases and abandonment and removal of the USTs, U Haul is not considered an offsite REC.

#### 441 Meeting Street Site (also listed as Pressing Club Cleaners)

The 441 Meeting Street site is located approximately 0.086-miles southeast of the Property and is listed in the State Hazardous Waste Site, Site Assessment and Remediation Public Record (ALLSITES), Registry of Conditional Remedies (RCR), Voluntary Cleanup Sites (VCP), Brownfields, RCRA Non Generators (Non-Gen), and FINDS databases. Based on the EDR report, the site has soil and groundwater contamination. However, the reported direction of groundwater flow is to the east, away from the Property. Based on the groundwater flow direction, the 441 Meeting Street Site is not considered an offsite REC.

#### Former Old Service Station

This facility is located at 512 Meeting Street, approximately 0.111-miles north of the Property and is listed in the UST and LUST databases. A release was reported at the facility in 2004 and a letter of NFA was issued in 2008. All USTs located at the facility have been abandoned and removed from the ground. Based on its currently regulatory status, this facility is not considered an offsite REC.

#### **Equipment and Storage Facility**

The Equipment and Storage Facility is located approximately 0.113-miles southeast of the Property and is listed in the GWCI, RCR, UST, and LUST databases. A release was reported at the facility in 1994 and a letter of NFA was issued in 2002. The reported direction of groundwater flow is to the east. Due to its downgradient location and current regulatory status, the Equipment and Storage Facility is not considered an offsite REC.

#### 556 King Street Site

The 556 King Street Site is located approximately 0.130-miles south of the Property and is listed in the SHWS, ALLSITES, VCP, and Brownfields databases. The EDR report did not provide details as to the status of the site. However, the site is located adjacent to the 441 Meeting Street Site, at which groundwater flow direction is to the east. Therefore, any impacts at the site are not expected to migrate towards the Property and thus, the 556 King Street Site is not considered an offsite REC.

#### King and Spring Streets Site

This facility is located at 544-562 King Street and 23 Spring Street, approximately 0.151-miles south of the Property. The site is listed in the SHWS, ALLSITES, VCP, and Brownfields. This facility is under a Voluntary Cleanup Contract with the same entity as the above-referenced 556 King Street site. Similarly, this site is also adjacent to the 441 Meeting Street Site, at which groundwater flow direction is to the east. Thus, impacted areas of these properties are not expected to migrate towards the Property. Therefore, the King and Spring Streets Site is not considered an offsite REC.

#### Ashley II of Charleston LLC

This facility was incorrectly located 0.130-miles south of the Property. The facility is actually located greater than two-miles north-northeast of the Property.

A number of additional facilities were identified in the EDR Report. However, a review of the information provided by EDR indicates these facilities have been issued letters of NFA, are located downgradient from the Property, and/or located at such a distance as they are not expected to impact the Property. Therefore, the remaining facilities are not considered offsite RECs.

#### **5.2 Additional Environmental Record Sources**

<u>Phase I Environmental Site Assessment – Five Commercial Tracts, Intersection of Meeting Street</u> <u>and Columbus Street</u>

A Phase I ESA was completed by General Engineering in April 2001 for five parcels located at the intersection of Meeting Street and Columbus Street. The report covers the entirety of the current Property. The following findings were identified during the ESA:

Former uses of the Property, including a former auto garage, four USTs, former truck
washing area, and inactive oil/water separator were identified as onsite RECs.
Additionally, the previous use as an ice manufacturing facility was identified as a REC.

- Several offsite facilities were identified as likely potential sources of environmental concern to the Property.
- Assessment of site soils and groundwater were recommended to determine if constituents of concern were present.

#### 5.3 Physical Setting Source(s)

The following materials were reviewed to develop an understanding of the physical setting of the Property:

#### United States Geological Survey (USGS) 7.5-Minute Topographic Map

A USGS 7.5-Minute topographic map titled Charleston, South Carolina, dated 1979, was reviewed. The topographic map depicts the Property as being in a developed area and located approximately 15-20 feet above mean sea level (MSL). Adjoining properties to the north, south, and west are located at the same approximate elevation as the Property. Properties to the east are located at lower elevations.

#### **Groundwater**

The subject property is located in the Coastal Plain Physiographic Province. The Coastal Plain is a wedge-shaped deposit of Cretaceous and younger sediments that range in thickness from near zero at the contact with the Piedmont Physiographic Province (the Fall Line) along its northwest edge, to thousands of feet at the coast. The Fall Line is the transitional boundary between the Coastal Plain and the Piedmont Physiographic Provinces. Coastal Plain soils are marine deposits laid down in the geologic past when ocean levels were higher and can contain various materials including interbedded soft and hard limestones, gravel, sands, silts, clays, and organics.

Shallow groundwater generally flows in directions subparallel to the ground surface slopes and under the influence of gravity toward points of discharge such as creeks, swamps, drainage swales, or pumped groundwater wells. Areas of relatively high elevation (ridges) typically act as groundwater recharge areas, and stream valleys are typically groundwater discharge zones. Shallow, water table groundwater typically flows in the approximate direction of the topographic gradient. Deeper bedrock aquifers can be affected by bedrock surface patterns and fractures, and directional flow of bedrock-level groundwater cannot be estimated without subsurface exploration, which is beyond the scope of this assessment. The water table and bedrock aquifers are interconnected. Groundwater existing within the coastal plain bedrock aquifers is recharged at inland outcrop locations. The natural shallow groundwater (water table) underlying the Property is expected to flow to the north and east towards the original drainage areas on the Charleston peninsula.

#### **Flood Maps**

Federal Emergency Management Agency (FEMA) flood plain maps were reviewed. Based on a review of the FEMA Map Center website, the Property is located within Flood Insurance Rate Map (FIRM) Community Number 45019C0512J Panel Number 000512. The map indicates a majority of the Property is located in Zone X, which is an area of minimal flood hazard. A very small portion of the Property along Meeting Street is depicted in Zone AE, the base floodplain. The base flood elevation based on a review of the adjacent flood map is 13 feet.

## 5.4 Historical Use Information on the Property and Adjacent Properties City Directories for the Property and Adjacent Properties

Charleston City directories and Charleston County Cross References listing residents and businesses alphabetically by name, address, and telephone number are compiled annually for many cities and towns in the United States. Each directory is cross-indexed by street address, allowing prior residents or businesses to be determined for the purpose of identifying past uses, typically associated with RECs. Charleston City Directories from 1938 to 2013 were examined in the Charleston County Library for references to the Property. A summary of the results of the review is presented in Appendix 19.4.

The city directories for Carlson Court, Columbus Street, Line Street, and Meeting Street were reviewed to identify listings for the Property. The following listings for Columbus Street were identified: 116 Columbus Street – Apartments (1958-1969); 112-124 Columbus Street – Arctic Ice & Coal Company (1938-1951). A specific address was not identified for the parcels located on Line Street and Carlson Court. However, a review of city directories for those general locations identified they had been used for residential purposes or vacant between 1938 and 2013. The following Property listing for Meeting Street were identified: 461 Meeting Street – residential (1938-1951); 465 Meeting Street: residential (1938-1945); Barber Shop/Shoe Shop (1951); Packet Motor Express (1961-1964); and Watkins Motor Lines (1979-2004 and 2013). Based on the likelihood, or known handing of chemicals of concern on the Property, the Arctic Ice & Coal Company and Packet Motor Express are considered onsite RECs.

City directories indicate that the surrounding properties have been developed with various residential, retail and commercial properties. The following is a list of properties in the immediate vicinity that are known or may have handled chemicals of concern. The following facilities were identified Columbus Street: 107-125 Columbus Street – Southern Railroad Shops (1938-1945); and 134 Columbus Street – Charleston Dry Cleaning Company (1938-1951).

The following facilities were identified on King Street: 583 King Street – Miracle Cleaners (1969); 584 King Street – U-Haul (1979-2013), Southland Motors (1974); and 594 King Street – King Street Shell Station (1944-1961).

The following facilities were identified on Line Street: 42-50 Line Street – Southern Railroad Car Shops (1938-1951); and 51-53 Line Street – Your Ice Company (1938-1951).

The following facilities were identified on Meeting Street: 456 Meeting Street – Luxuree Cleaners (1958); 466 Meeting Street – Lyerly's Cleaners (1944-1951); 478 Meeting Street – Bennett's Exxon (1979-1989), Fordham's Exxon (1969-1974), and Meadow's Esso (1961); and 509 Meeting Street – Duke's Gulf Service Station (1961).

The following facilities were identified on Saint Philip Street: 253 St. Philip Street – Wainwright Printers (1944-1969).

The following facilities were identified on Spring Street: 2-18 Spring Street – Southern Railroad Company Shops (1938-1958); and 20 Spring Street – A C Huthmacher Wood & Coal Yard (1938).

Based on their proximity to the Property and likelihood of handling chemicals of concern, the following facilities are considered offsite RECs: 107-125 Columbus Street – Southern Railroad Shops, 134 Columbus Street – Charleston Dry Cleaning Company, 594 King Street – King Street Shell Station, and 42-50 Line Street – Southern Railroad Car Shops.

#### **Aerial Photographs for the Property and Adjacent Properties**

Aerial photographs taken in 1957, 1961, 1968, 1971, 1973, 1983, 1989, 1994, 1999, 2006, and 2011 were obtained from EDR, the United Stations Department of Agriculture (USDA) and the South Carolina Department of Natural Resources (SCDNR). Each photograph was examined for evidence of practices or conditions that could potentially impact the Property.

Copies of the aerial photographs reviewed are included in Appendix 19.5. The western adjacent Southern Railroad right-of-way represents an offsite REC based on COCs that are

typically elevated above surrounding background concentrations in the surface soils in the immediate area of a rail.

#### Sanborn Fire Insurance Company Maps for the Property and Adjacent Properties

From the late 1800's to the mid 1970's, the Sanborn Fire Insurance Company mapped industrial areas of cities and towns in the United States where the potential for loss was the greatest. Each map was examined for evidence of practices or conditions that could potentially impact the Property. Copies of Sanborn Fire Insurance maps are provided in Appendix 19.6.

| Sanborn Date | Property and Adjacent Property Descriptions  |     |  |
|--------------|--|-----|--|
| 1884         | Property: Most of Property not depicted; southern portion along Columbus Street depicted as residential  North: Residential; Line St; Southern Railroad Car; Railroad Passenger Station; residential  East: Meeting Street; door & blind manufacturer; residences  South: Columbus Street; Southern Railroad Repair Shop (iron foundry, blacksmith, boilers)  West: Not depicted     |     |  |
| 1888         | Property: Numerous residences North: Similar to 1884 East: Similar to 1884 South: Columbus Street; Southern Railroad Repair Shop; residences; miscellaneous shops West: Railroad; horse stable; residences   | Yes |  |
| 1902         | Property: Scrap iron yard (in southeast); remaining depicted with residences  North: Similar to 1888  East: Similar to 1888  South: Similar to 1888  West: Railroad, lumber yard, residences   | Yes |  |
| 1944         | Property: Arctic Ice Company and wood yard (southwest portions); store (southeast along Meeting & Columbus Streets); residences  North: Similar to 1902  East: Meeting Street; cleaning/pressing store; other miscellaneous stores; residences  South: Columbus Street; Southern Railroad Repair Shop; residences  West: Railroad; auto junk yard; Your Ice Company; Filling Station | Yes |  |
| 1951         | Property: Similar to 1944 North: Similar to 1944 East: Similar to 1944 South: Similar to 1944 West: Railroad; Your Ice Company; the News and Courier; Filling Station  | Yes |  |

| 1955 | Property: Residences; Ice Company depicted as apartments; wood yard is depicted as parking North: Similar to 1951 East: Similar to 1951 South: Southern Railroad Property (most of repair facility not depicted) West: Similar to 1951  | Yes |
|------|---|-----|
| 1967 | Property: Motor freight station along Meeting Street; Auto garage west of freight company; miscellaneous store in southeast corner; apartments; parking; residences  North: Residences; filling station; not depicted north of Line Street  East: Filling station; church; miscellaneous stores; residences  South: Redeveloped into store  West: News and Courier facility | Yes |
| 1973 | Property: Similar to 1973 North: Tire warehouse; filling station; residences; Line Street; Southern Railroad facility; residences East: Similar to 1967 South: Similar to 1967 West: Similar to 1967  | Yes |

The following onsite RECs were identified during review of the Sanborn Fire Insurance maps: presence of the Arctic Ice Company, auto garage, and motor freight company. The following offsite RECs were identified during review of the Sanborn Fire Insurance maps: Southern Railroad Car Shops located north on Line Street and south on Columbus Street, Southern Railroad right-of-way on the western adjacent property, and the filling station located southwest of the Property at the intersection of King and Columbus Streets (current location of the Post & Courier facility).

#### Other Historical Records for the Property

No additional historic records were reviewed as part of this report.

#### 6.0 SUBJECT SITE RECONNAISSANCE

#### 6.1 Methodology and Limiting Conditions

On October 16, 2012, a visual inspection of the Property and surrounding properties was conducted by Mr. Reginald C. Reeves. The Property and surrounding properties, shown on Figure 2, were observed for evidence of RECs and potential sources of environmental impact to the groundwater and soil on the Property. Photographs of the Property are provided in Appendix 19.7.

#### 6.2 General Property Setting

The Property is located on Columbus, Meeting, and Line Streets in Charleston, South Carolina. The area is characterized by a mixture of residential, commercial, and retail uses.

#### 6.3 Observations

The Property is currently not developed with any structures. The southwestern parcel of the Property is used as an asphalt-paved parking lot for adjacent businesses. The southeastern portion of the Property is currently leased by a construction company for the purpose of storing materials and equipment. The two northern parcels are grassed, vacant parcels. The Property is bordered to the north by residential properties, a restaurant, Line Street and a storage facility; to the south by Columbus Street and a grocery store; to the east by Meeting Street and various retail stores; and to the west by a railroad right-of-way and the Post and Courier facility.

| General Property Observations   |  |  |  |
|---|--|--|--|
| Description   | Reported/<br>Observed<br>Onsite<br>(Y/N) | Comments   |  |
| Hazardous Substances and<br>Petroleum Products in<br>Connection with Identified<br>Uses                   | N  | None   |  |
| Storage Tanks   | Υ  | Four UST fill covers were observed on the southeastern parcel of the Property.   |  |
| Strong, Pungent, or<br>Noxious Odors  | N  | None   |  |
| Pools of Liquid   | N  | None   |  |
| Drums   | N  | None   |  |
| Hazardous Substances and<br>Petroleum Products<br>Containers Not in<br>Connection with Identified<br>Uses | N  | None   |  |
| Unidentified Substance<br>Containers  | N  | None   |  |
| Potential Polychlorinated<br>Biphenyls (PCB)-Containing<br>Equipment                                      | Y  | Pole-mounted transformers were observed in the vicinity of the Property: Three were observed on the northern adjacent property developed with a Pizza Hut; two were observed adjacent to the storage facility north of Line Street; and one was observed adjacent to the residences on Line Street. Only the two transformers observed adjacent to the storage facility were marked with a blue label indicating it has been tested and is free of PCBs. |  |

| General Property Observations          |  |  |  |
|--|--|--|--|
| Description                            | Reported/<br>Observed<br>Onsite<br>(Y/N) | Comments   |  |
| Hydraulic Equipment                    | N  | None   |  |
| Contracted Maintenance<br>Services     | N  | None   |  |
| Utilities and Stormwater<br>Management | Y  | Overhead power lines were observed in the vicinity of the Property. Additionally, a cluster of water meters were observed on the sidewalk bordering the southern Property boundary with Columbus Street. |  |
| Other                                  | N  | None   |  |

| Exterior Observations                       |   |   |  |
|---|---|---|--|
| Description                                 | Reported<br>or<br>Observed<br>Onsite<br>(Y/N) | Comments  |  |
| Pits, Ponds, Lagoons, and<br>Surface Waters | N   | None  |  |
| Stained Soil or Pavement                    | N   | None  |  |
| Stressed Vegetation                         | N   | None  |  |
| Solid Waste                                 | N   | None  |  |
| Process/industrial<br>Wastewater Discharges | N   | None  |  |
| Wells                                       | N   | None  |  |
| Septic Systems                              | N   | None  |  |
| Other                                       | Y   | A concrete pad with vault was observed near the Property boundary with Meeting Street. The vault could not be accessed, but based on a previous report and interview with the General Service Manager for the owner, the vault is likely an inactive oil/water separator. |  |

The four USTs and inactive oil/water separator are considered onsite RECs. The western adjacent railroad right-of-way is considered an offsite REC.

#### 7.0 INTERVIEWS

People with knowledge of the Property were interviewed in an effort to evaluate the presence or absence of RECs, historical RECs, and/or de minimis conditions associated with the Property. GEL's interview with the User is documented in Section 4.0.

| Name  | Affiliation                       | Comments   |
|---|-----------------------------------|--|
| Tommy McGee                                 | General<br>Services<br>Manager    | Mr. McGee of the Evening Post Publishing Co. was interviewed regarding his knowledge of the Property and surrounding properties. Mr. McGee stated that the southeastern parcel of the Property was previously used by Packet Motor Lines, a long-haul carrier and distribution operation for the Post and Courier. The parcel was developed with two buildings, one of which contained 8 high bays for loading/unloading, as well as offices. The second was a small building used for the maintenance and fueling of trucks. Four USTs for fueling purposes were used in association with these activities. Mr. McGee stated that two USTs contained diesel fuel, one gasoline, and he was unsure of the contents of the fourth UST. Mr. McGee stated that Packet Motor Lines used the facility until approximately 1970, at which time the use of the USTs ceased. He stated that the USTs have been filled with sand and to his knowledge, did not leak. He stated that an oil/water separator is still located on the Property, but is not in use. Following Packet Motor Lines this portion of the Property was used by Watkins Motor Lines, but only as a distribution facility. No maintenance or fueling of vehicles occurred on the Property during its use by Watkins Motor Lines. After Watkins Motor Lines discontinued use of the Property, the buildings were demolished. The Property is currently leased by a construction company as a laydown/storage area for equipment. Mr. McGee was questioned regarding previously ownership of the Property and stated that the Evening Post Publishing Company conducted extensive title searches and portions of the Property were likely Heirs Property and used for residential purposes. He also stated that he has no knowledge of any spills or releases of chemicals that may have impacted site soils and/or groundwater at the Property. |
| Not Applicable                              | Property<br>Manager               | Same as Property Owner.  |
| Not Applicable<br>Joel Padgett              | Prior Owner SCDHEC – UST Division | Prior owners were not interviewed as part of this ESA.  Mr. Joel Padgett of the SCDHEC-UST Division was interviewed about the four USTs located on the Property. Mr. Padgett stated that the State's UST database does not have a record of any USTs at 465 Meeting Street, the location of Watkins Motor Lines. He stated that site may have been closed prior to 1974 and was never registered.  |
| Deputy Chief<br>Wm. Franklin<br>Finley, Jr. | Charleston<br>Fire<br>Department  | Deputy Chief Finley of the Charleston Fire Department was contacted to inquire about any incidences at the Property to which his Department may have responded, especially as it relates to fires, spills/releases, and HAZMAT responses. The stated that he is unaware of any responses at the Property.  |

Communication records are included in Appendix 19.8.

#### 8.0 DATA GAPS AND FAILURES

ASTM Standard E 1527-05 and 40 CFR Part 312, "Standards and Practices for All Appropriate Inquiries," specifically require that all data gaps and/or data failures in the research be identified and comments regarding the significance of the data gaps on the ability of the environmental professional to identify RECs be provided. No significant data gaps were identified as part of this Phase I ESA:

#### 9.0 FINDINGS

- The Property consists of four parcels located on Columbus, Line, and Meeting Streets in Charleston, South Carolina. The southern parcels of the Property are mostly asphalt-paved. The southeastern parcel is leased by a construction company for equipment and material storage. The southwestern parcel is used by adjacent businesses as a parking lot. The northern parcels are undeveloped and grassed.
- The Property is generally bound to the north by the Carlson Court right-of-way, residences, Pizza Hut, Line Street, and a storage facility; to the south by a Piggly Wiggly grocery store; to the east by Meeting Street and various retail businesses; and to the west by a railroad right-of-way and the Post & Courier Facility.
- A review of Charleston City Directories and Sanborn Fire Insurance maps identified that the Arctic Ice and Coal Company was previously located on the southwest portion of the Property. Based on the likelihood of handling COCs, the former Arctic Ice and Coal Company is an onsite REC.
- The Property was previously developed with the Packet Motor Lines and subsequently, Watkins Motor Lines. Multiple onsite RECs were identified in association with this previous development, including a former truck washing area, a former truck maintenance garage, an inactive oil/water separator, and four USTs.
- The western adjacent property is developed with a railroad right-of-way. Fuels used to power trains typically contain metals and PAHs. Furthermore, railroad ties are pressure treated with creosote or metal-containing wood preservatives as a means of reducing rot and extending service life. Consequently, railroad ties commonly contain metals and/or PAHs. These COCs are sometimes elevated above surrounding background concentrations in the surface soils in the immediate area of a rail line; thus, the railroad right-of-way represents an offsite REC. However, PAHs often occur in urbanized areas as a result of a variety of anthropogenic sources in addition to railroads.
- Charleston City Directories and Sanborn Fire Insurance maps identify several offsite facilities in the proximity of the Property that likely handled COCs. These facilities include the former King Street Shell Station located at the intersection of King and Columbus Streets, two Southern Railroad Car Shops previously located on Line and

- Columbus Streets, the Charleston Dry Cleaning Company located on Columbus Street, and the Southern Railroad right-of-way located on the western adjacent property. Each of these facilities represents an offsite REC.
- Several offsite facilities are identified in various regulatory databases. However, none of the identified facilities represent offsite RECs based on their regulatory status, distance from the Property, and/or direction of groundwater flow.

#### 10.0 OPINION

Multiple onsite RECs were identified by this ESA, which include the former Arctic Ice & Coal Company located in the southwest portions of the Property and the inactive oil/water separator, four USTs, former truck washing area, and a former truck maintenance garage associated with the former Packet Motor Lines and Watkins Motor Lines.

Several offsite RECs were identified in the proximity of the Property, which include the former King Street Shell Station previously located at the intersection of King and Columbus Streets, the Southern Railroad Car Shops previously located on Line and Columbus Streets, the Charleston Dry Cleaning Company located on Columbus Street, and the Southern Railroad right-of-way located on the western adjacent property.

GEL recommends that the soils be assessed in the areas of the identified onsite RECs, as well as the collection of groundwater samples on the Property to determine if COCs are present from the onsite and offsite RECs. GEL also recommends the proper excavation and disposal of the four USTs identified on the Property prior to site redevelopment.

#### 11.0 CONCLUSIONS

GEL has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 of four parcels totaling 2.806-acres (TMS No. 459-05-03-115, -118, -124, and -133) and located at Meeting, Columbus, and Line Streets in Charleston, Charleston County, South Carolina. Any exceptions to, or deletions from, this practice are described in Sections 12.0 and 13.0. This assessment identified four onsite RECs and five offsite RECs. Additional assessment is recommended to assess the soils in the areas of the onsite RECs and assess groundwater on the Property. Additionally, it is recommended that the proper excavation and disposal of the four USTs on the Property be performed prior to site redevelopment.

#### **12.0 DEVIATIONS**

GEL is not aware of any deviations from ASTM Standard E 1527-05 or 40 CFR Part 312 in the text or preparation of this report.

#### 13.0 ADDITIONAL SERVICES AND NON-SCOPE ISSUES

The following non-scope issues were neither requested by Charleston nor addressed by this Phase I ESA: endangered species, regulatory compliance audits, ecological resources, industrial hygiene, indoor air quality, biological agents, mold, health and safety, power lines and electromagnetic fields, wetlands, asbestos survey or abatement, lead-based paint and related services, lead-in-drinking-water, radon, cultural and historical resources, surveying for line and grade, quantity estimates, detailed plans and specifications, waste characterization and treatment schemes, and geotechnical or structural engineering services, media sampling (soil, sediment, surface water, ground water, air, building materials, etc.), vapor intrusion, assessment of Continuing Obligations or compliance with Activity and Use Limitations, if present.

#### 15.0 Environmental Professional Declaration

I declare that, to the best of my professional knowledge and believe, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312, "Innocent Landowners, Standards for Conducting All Appropriate Inquiry."

Joseph E. Coffey, Jr., P.E

#### 16.0 Signatures of Environmental Professionals

This report, entitled "Phase I Environmental Site Assessment," has been prepared for four parcels totaling 2.806-acres (TMS No. 459-05-03-115, -118, -124, and -133) and located at Meeting, Columbus, and Line Streets in Charleston, Charleston County, South Carolina, at the request of and for the exclusive use of Charleston and the Post and Courier. It has been prepared in accordance with the guidelines set forth in the ASTM Standard E 1527-05, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," and 40 CFR Part 312, "Standards and Practices for All Appropriate Inquires." It has been prepared in accordance with accepted quality control practices and has been reviewed by the undersigned.

## C. **CLIENT shall furnish the following:**

- 1. Access to the site, and information as specified in the proposal.
- 2. CLIENT shall provide GEL ENGINEERING personnel with information regarding any and all potential hazards and CLIENT shall notify GEL ENGINEERING if personal protective measures/equipment are required when working on the project site(s) associated with this Agreement. GEL ENGINEERING personnel shall be provided with a copy of any health and safety plan available for the project site(s), and they will be afforded the opportunity to review that material prior to beginning work.
- D. This Agreement, as signed by the CLIENT and/or his/her/its representative, includes the following Standard Terms and Conditions.

## STANDARD TERMS AND CONDITIONS OF THE AGREEMENT

- 1. **EXTRA WORK:** Extra work shall include, but not be limited to, additional office or field work caused by policy or procedural changes or governmental agencies, changes in the project, and work necessitated by any of the causes described in Paragraph 13 hereof. All extra work shall be authorized by **CLIENT**, in writing, prior to commencement by **GEL ENGINEERING**.
- RESPONSIBILITY OF GEL ENGINEERING: CLIENT recognizes that site conditions (including physical, environmental, ecological and construction conditions) may vary from those observed at specific locations where borings, surveys or explorations are made, and that such conditions may change with time. Data, interpretations and recommendations by **GEL ENGINEERING** will be based solely on information available to **GEL ENGINEERING** at the time. **GEL ENGINEERING** is not responsible for other parties' interpretation or use of the data and other information provided by **GEL ENGINEERING**.

| <b>PROJECT</b> | CODE: |  |
|----------------|-------|--|
|                |       |  |

- 3. STANDARD OF CARE: Services provided by GEL ENGINEERING under this Agreement will be performed in a manner consistent with that degree of care and skill ordinarily exercised by members of the same profession practicing contemporaneously under similar conditions in the same locale as the project. Under no circumstance is any warranty, express or implied, made in connection with any Services provided by GEL ENGINEERING under this AGREEMENT. GEL ENGINEERING and CLIENT agree that the discovery of unanticipated hazardous materials may make it necessary for GEL ENGINEERING to take immediate measures to protect health and safety. CLIENT agrees to compensate GEL ENGINEERING for any equipment, decontamination or other costs incidental to the discovery of unanticipated hazardous materials.
- 4. OWNERSHIP OF DOCUMENTS: All tracings, specifications, computations, survey notes and other original documents and instruments of service are and shall remain the property of GEL ENGINEERING unless otherwise provided by law. CLIENT shall not use such items on other projects without GEL ENGINEERING'S prior written consent. GEL ENGINEERING shall not release CLIENT'S data without authorization.
- 5. RESTRICTIONS ON USE OF REPORTS: CLIENT acknowledges that any reports rendered under this Agreement will be prepared in accordance with the agreed Scope of Services and pertain only to the subject project and are prepared for the exclusive use of the CLIENT. Use of the reports and data contained therein for other purposes is at the CLIENT's sole risk and responsibility, and CLIENT agrees to hold harmless and indemnify GEL ENGINEERING for any claims, causes of action or damages arising therefrom.
- 6. SITE SAFETY: GEL ENGINEERING shall take reasonable safety precautions with respect to the performance of the services contained in any project safety plan agreed to between the CLIENT and GEL ENGINEERING, or an equivalent document, including written modifications thereto. GEL ENGINEERING shall not be responsible for site safety and shall have no obligation to direct or stop the work of Client's contractors, agents, or employees.
- 7. **OBSERVATION AND TESTING OF CONSTRUCTION, SAFETY:** The observation and testing of construction is not included herein unless specifically listed in the Scope of Services set forth in Paragraph A of this Agreement. The presence of **GEL ENGINEERING'S** representative will be for the sole, limited purpose of gathering information and performing field testing. Under no circumstances is **GEL ENGINEERING** expected, not does it intend, to directly control or supervise the physical activities of the contractor's workmen to accomplish the work on the project. **GEL ENGINEERING'S** field representative is present at the site to provide the **CLIENT** with a continuing source of information based upon the field representative's observations of the contractor's work, but **GEL ENGINEERING'S** work shall not include any superintending, supervision, or direction of the actual work of the contractor or the contractor's workman. The **CLIENT** shall inform the contractor that neither the presence of **GEL ENGINEERING'S** field representatives, nor observation and testing personnel, shall excuse the contractor in any way for defects discovered in the contractor's work. The **CLIENT** acknowledges and accepts that **GEL ENGINEERING** is not responsible for job or site safety on the project.
- 8. SUBTERRANEAN STRUCTURES: The CLIENT shall have the responsibility for identifying all subterranean structures or utilities which exist at the site prior to any work being performed by GEL ENGINEERING. GEL ENGINEERING has no liability to CLIENT and shall be indemnified by CLIENT against claims of any and all parties for damage or injury resulting from damage to subterranean structures or utilities which are not called to GEL ENGINEERING'S attention and correctly shown in the contract documents or otherwise furnished to GEL ENGINEERING in writing by CLIENT. The CLIENT agrees that its authorized representative will review all proposed boring locations in the field and either approve such locations or designate alternate locations.
- 9. **SUBCONTRACT:** GEL may at any time, upon written notice and approval by **CLIENT**, delegate, orally or in writing, or subcontract the performance of these services, or any portion thereof.

| <b>PROJECT</b> | CODE: |  |
|----------------|-------|--|
|                |       |  |

- SITE ACCESS: The CLIENT agrees to provide or obtain full and uninhibited access to the site and a safe
  working environment for performance of the services for GEL ENGINEERING, its employees and
  subcontractors.
- 11. **CLIENT RESPONSIBILITY FOR AGENCY NOTIFICATION: CLIENT** shall be responsible for notification of the appropriate local, State or Federal agencies as required by law, or otherwise, to disclose in a timely manner any information that may be necessary to prevent any danger to health, safety and the environment or to comply with existing regulations.
- 12. **APPROVAL OF WORK:** The work performed by **GEL ENGINEERING** shall be deemed approved and accepted by **CLIENT** as and when invoiced, unless **CLIENT** objects within 30 days of the invoice date by written notice identifying, with specificity, the reason(s) **CLIENT** believes such work is incomplete or defective.

#### 13. PAYMENT TERMS:

- a. The CLIENT agrees to pay for services provided by GEL ENGINEERING in accordance with the terms of this Agreement between the parties, including any additional services in excess of those stated in this Agreement as specifically authorized by CLIENT. Payment is due Within 30 days of the date of the invoice.
- b. Past due amounts are subject to interest at 1½ percent (1.5%) per month.
- c. **GEL ENGINEERING** will stop work and withhold any submittals and/or other forms of project deliverables when payment is not received within 60 days of invoice date, or when invoice totals exceed \$50,000 unless exception has been mutually negotiated.
- d. The **CLIENT'S** obligation to pay for the services contracted is in no way dependent or conditioned upon the **CLIENT'S** ability to obtain financing, approval of governmental or regulatory agencies, or upon the **CLIENT'S** successful completion of the project.
- e. The CLIENT agrees to compensate GEL ENGINEERING for services and normally reimbursable expenses if GEL ENGINEERING is required to respond to legal processes related to GEL ENGINEERING'S services for the CLIENT. Compensated services include hourly charges for all personnel involved in the response and attorney fees reasonably incurred in obtaining advice concerning the response, the preparation of the testifier, and appearances related to the legal process.
- 14. DELAY: Any delay, default, or termination in or of the performance of any obligation of GEL ENGINEERING under this Agreement caused directly or indirectly by strikes, accidents, acts of God, shortage or unavailability of labor, materials, power or transportation through normal commercial channels, failure of CLIENT or CLIENT's agents to furnish information or to approve or disapprove GEL ENGINEERING work promptly, late, slow or faulty performance by CLIENT, other contractors or governmental agencies, the performance of whose work is precedent to or concurrent with the performance of GEL ENGINEERING'S work, or any other acts of the CLIENT or any other Federal, State, or local government agency, or any other cause beyond GEL ENGINEERING'S reasonable control, shall not be deemed a breach of the Agreement. The occurrence of any such event shall suspend the obligations of GEL ENGINEERING as long as performance is delayed or prevented thereby.
- 15. **TERMINATION:** This Agreement may be terminated by either party upon seven (7) days' written notice in the event of substantial failure by the other party to perform in accordance with the terms hereof through no fault of the terminating party. In the event of termination, **GEL ENGINEERING** shall be paid for all services rendered to the date of termination, as well as for all reimbursable expenses and termination expenses. For purposes of this section, the failure of the **CLIENT** to pay **GEL ENGINEERING** within sixty (60) days of receipt of an invoice shall be considered such a substantial failure, unless other payment terms have been mutually agreed to beforehand, and **CLIENT** agrees to waive any claim against **GEL ENGINEERING** and to indemnify, defend and hold harmless from and against any claims arising from **GEL ENGINEERING'S** suspension or termination due to **CLIENT'S** failure to provide timely payment. In the event of a substantial failure on the part of the **CLIENT, GEL ENGINEERING**, in addition to the right to terminate set forth in this paragraph, may also elect to suspend work until the default in question has

| <b>PROJECT</b> | CODE: |
|----------------|-------|
|                |       |

been cured. No delay or omission on the part of **GEL ENGINEERING**, in exercising any right or remedy hereunder shall constitute a waiver of any such right or remedy on any future occasion.

- 16. INDEMNIFICATION: CLIENT shall indemnify, defend and hold GEL ENGINEERING harmless for any and all loss, cost, expense, claim, damage, or liability of any nature arising from or related to CLIENT'S acts or omissions under this Agreement, including, without limitation, the following: (a) soil conditions; (b) changes in plans or specifications made by CLIENT or others; (c) use by CLIENT or others of plans, surveys, or drawings unsigned by GEL ENGINEERING or for any purpose other than the specific purpose or project for which they were designed; (d) job site conditions and performance of work on the project by others; (e) inaccuracy of data or information supplied by CLIENT; and (f) work performed on material or data supplied by others, regardless whether said loss was caused in part by GEL ENGINEERING'S negligent acts, errors, or omissions.
- 17. **LIMITATION OF LIABILITY:** The **CLIENT** agrees that **GEL ENGINEERING'S** liability for damages to the **CLIENT** for any cause whatsoever in connection with this project, and regardless of the form or type of action, whether in contract or in tort, including negligence, shall be limited to the greater of Fifty Thousand Dollars (\$50,000.00) or **GEL ENGINEERING'S** total fee for services rendered on the project.
- 18. **INSURANCE: GEL ENGINEERING** shall procure and maintain throughout the period of this Agreement, at **GEL ENGINEERING'S** own cost, insurance for protection from claims under general, automobile and professional liability, worker's compensation, and temporary disability as required by applicable State and Federal laws. Certificates for all such policies of insurance shall be provided to the **CLIENT** upon written request. **GEL ENGINEERING** shall not be responsible for any loss, damage or liability beyond the amounts, limits and conditions of such insurance.
- 19. **FORCE MAJEURE:** Should completion of any portion of the services be delayed beyond the estimated date of its completion for any reason outside the control of or without fault or negligence of **GEL ENGINEERING**, the parties shall mutually agree on the terms and conditions upon which the services may be continued. Force majeure includes unforeseeable causes beyond the control and/or without the fault or negligence of **GEL ENGINEERING** including, but not restricted to, acts of God, or the public enemy, acts of the government of the United States or of the several states, or any foreign country, or any of them acting in their sovereign capacity, acts of **CLIENT'S** contractors, fires, floods, epidemics, riots, quarantine restrictions, strikes, civil insurrections, freight embargoes, and unusually severe weather.
- 20. **LIMITATIONS OF COST ESTIMATES:** Any estimate of the construction cost of the project or any part thereof is not to be construed, nor is it intended, as a guarantee of the total cost.
- 21. **REPLACEMENT OF SURVEY STAKES:** If specifically included in Paragraph A of the Agreement, **GEL ENGINEERING** will provide necessary construction stakes. In instances where it is determined that negligence on the part of the **CLIENT** or others results in the need for re-staking, the cost of such restaking will be billed as an extra to the **CLIENT** on a time and material basis. It will be the **CLIENT's** responsibility to provide adequate protection of the stakes against his/her/its own negligence or the negligence of those working for or with the **CLIENT** and against vandalism by others. If staking is ordered by the **CLIENT** or others prematurely and construction does not take place, it will also be the **CLIENT's** responsibility to protect said stakes until such time as construction takes place.
- 22. **DISPOSAL OF HAZARDOUS OR POTENTIALLY HAZARDOUS SAMPLES:** Unless the **CLIENT** requests, samples for analysis will be disposed of upon completion of analysis. In the event that samples contain or may contain hazardous materials, **GEL ENGINEERING** shall, after completion of testing and at **CLIENT'S** expense, (a) return such sample to client, or (b) arrange for disposal in a manner which complies with applicable regulations. **CLIENT** recognizes and agrees that **GEL ENGINEERING** is acting as a bailee and at no time assumes title to said samples.
- 23. **DISPUTE RESOLUTION/MEDIATION/ARBITRATION: CLIENT** and **GEL ENGINEERING** agree to make every effort to resolve all claims, disputes or controversies arising out of, or in relation to the interpretation, application or enforcement of this Agreement through mediation. The parties further agree that the **CLIENT** will require, as a condition for participation on the project and their Agreement to perform labor

| <b>PROJECT</b> | CODE: |  |
|----------------|-------|--|
|                |       |  |

or services, that all contractors, subcontractors, sub subcontractors and material-persons, whose portion of the work amounts to five thousand dollars (\$5,000.00) or more, and their insurers and sureties, agree to this procedure. All disputes not resolved through Mediation shall be decided by arbitration in accordance with the Commercial Arbitration Rules of the American Arbitration Association in effect at the time the dispute arises. Any award rendered by the arbitrator or arbitrators shall be final and judgment may be entered upon it in accordance with South Carolina law.

- 24. **LITIGATION:** Should litigation or arbitration be necessary to collect any portion of the amounts payable to **GEL ENGINEERING** hereunder, then all of **GEL ENGINEERING'S** costs and expenses of litigation and collection, including without limitation, fees, court costs, and attorney's fees (including such costs and fees on appeal), shall be paid by the **CLIENT**.
- 25. **SUCCESSORS AND ASSIGNS:** Neither **CLIENT** nor **GEL ENGINEERING** shall assign, sublet, or transfer any rights under or interest in (including, but without limitation, monies that may become due or monies that are due) this Agreement without the written consent of the other, except to the extent that any assignment, subletting or transfer is mandated by law or the effect of this limitation may be restricted by law.
- 26. **AUTHORIZED REPRESENTATIVES:** Promptly following the execution of this Agreement, each party shall designate an authorized representative to represent and act for it with respect to matters relating to this Agreement. Each party may, from time to time, designate a new authorized representative by providing the other party by written notice of such change.
- 27. ENTIRE AGREEMENT: This Agreement, including the contract documents, constitutes the entire Agreement between the CLIENT and GEL ENGINEERING and supersedes all prior agreements. Any term, condition, prior course of dealing, course of performance, understanding, purchase order conditions, or other agreement purporting to modify, vary, supplement, or explain any provision of this Agreement is of no effect unless placed in writing and signed by both parties subsequent to the date of this Agreement.
- 28. **NOTICES:** All notices called for by this contract shall be in writing and shall be deemed to have been sufficiently given or served when presented personally and when deposited in the mail, postage prepaid, certified and return receipt requested, addressed as follows:

Client Contact Joseph E. Coffey, Jr., P.E., Director

-124, & -133

## **Executive Summary**

This Phase I Environmental Site Assessment (ESA) was conducted to determine the presence or absence of potential sources of environmental impact to five commercial tracts located at the intersection of Meeting Street and Columbus Street in Charleston, South Carolina.

Both on-site and off-site recognized environmental conditions have been identified. On site, a former auto garage, four underground storage tanks (USTs) near the former garage, a former old truck washing area, and an inactive oil/water separator have been identified. Former and current off-site facilities that handled or handle chemicals of concern have been identified. We recommend collecting soil samples in the on-site areas of concern, and installing three groundwater monitoring wells in order to determine if constituents of concern are present on site from off-site sources.

Due to the age of the development, it is possible that asbestos-containing materials (ACMs) and lead-based paint (LBP) were used during construction. According to the Department of Health and Environmental Control (DHEC) Regulation 61-86.1, an asbestos survey is required by a licensed asbestos inspector to determine the presence or absence of ACMs prior to renovation or demolition of buildings. If ACMs are identified in the building, this could increase the cost of any demolition or renovation to the building. In case of demolition or renovation, the paint or the components containing LBP should be disposed in a municipal solid waste landfill at a minimum, as opposed to a construction and debris landfill, in accordance with the South Carolina Solid Waste Management Regulation 61-107.11. Excluding transportation costs, the cost of disposal in a municipal solid waste landfill is approximately \$25 a ton.

# Phase I Environmental Site Assessment

Five Commercial Tracts

## 1.0 Introduction

The subject site is five commercial tracts located at the intersection of Meeting Street and Columbus Street in Charleston, South Carolina. The location of this site is shown on Figure 1, an excerpt from the United States Geologic Survey (USGS) 7.5-minute quadrangle map of Charleston, South Carolina. Currently, Watkins Motor Line, The Post and Courier parking lot, a vacant concrete block building, and two vacant lots comprise the subject site, as shown on Figure 2.

Mr. Hall T. McGee, a representative for The Post and Courier, requested that General Engineering conduct a Phase I Environmental Site Assessment (ESA) for the site. This ESA was conducted to determine the potential of environmental impact to the site and is intended to fulfill the due diligence clause of the "innocent landowner" defense of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This ESA was conducted in general accordance with the guidelines set forth in the American Society for Testing and Materials (ASTM) Standard E 1527-00, "Standard Practice for Phase I Environmental Site Assessment Process," and consisted of the tasks listed below.

- · Inspection of the subject site and surrounding properties
- Examination of historical documents
- Interviews with individuals and public officials familiar with the site's history
- Examination of state and federal regulatory agency records

This ESA varies from the following sections of ASTM Standard E 1527-00 because, in our best professional judgment, these sections were not applicable to this assessment.

- Section 11.1 Report Format We use our standard format, which varies from the ASTM Standard, but generally contains the same information.
- Section 11.2 Documentation For brevity, we have not attached the research documents. However, we will maintain them in our files if you should need them in the future.

GENERAL ENGINEERING
PO Box 30712 • Charleston, SC 29417 • 2040 Savage Road • 29407
(843) 769-7378 • Fax (843) 769-7397

- Section 11.7 Conclusions We vary from the ASTM format by including our conclusions and recommendations in the text of the report.
- Section 11.12 Qualifications Personnel credentials are typically supplied upon request.

The findings of this assessment are presented below. Per your request, we have included our recommendations.

# 2.0 Inspection of the Subject Site and Surrounding Properties

On April 10, 2001, a visual inspection of the subject site and surrounding properties was conducted by Jennifer Gurreri of General Engineering by walking the site and walking through the buildings. There were no access restrictions. The site and surrounding properties, shown on Figure 2, were inspected for evidence of potential sources of environmental impact to the groundwater and soil of the subject site.

## 2.1 Subject Site

The subject site, shown in Figure 1, consists of five commercial tracts. There are three buildings located on site. Watkins Motor Lines (Watkins) occupies one of the tracts and occupies two of the three buildings. The building on the northeastern end of the site is Watkins' warehouse and offices. The exterior of the building consists of brick and concrete with a flat asphaltic shingle roof. The interior walls of the office are wood paneled, the floors are floor tile, ceramic tile, and carpeted, and the ceilings are drop ceilings. None of the activities in the offices are considered potential sources of environmental concern to the site.

The warehouse has twelve bay doors, six on the east side and six on the west side of the building. The trucks enter through the bay doors to load and unload cargo. The interior floors are concrete, the walls have wood boards over the concrete, and the ceiling is a cementitious transite material. There is an inground weight scale located in the center of the warehouse. There are two drums containing motor oil in the warehouse. There is some staining of the concrete floor; however, there are no drains. Therefore, it is not considered a likely source of environmental concern.

The warehouse has fluorescent lights. Ballasts for fluorescent light fixtures in buildings constructed prior to 1978 may contain poly-chlorinated biphenyls (PCBs), which are carcinogenic. Since the buildings on the subject site were constructed prior to 1978, we recommend that an inspection of fluorescent fixtures be performed prior to demolition or renovation. Ballasts containing PCBs are no longer exempt from PCB disposal

requirements; therefore, the disposal of PCB-containing ballasts will increase general disposal costs. Additionally, fluorescent bulbs require proper disposal or recycling, because of their mercury content.

The second building on the Watkins tract is currently vacant. According to Mr. Hall T. McGee with the Post and Courier (owner of the subject site), this building was used as a repair shop for the trucks. The exterior of the building consists of transite panels and a flat asphaltic shingle roof. The interior walls are wood paneled, the ceiling is wood and sprayapplied, and the floors are concrete and floor tile. There is an aboveground storage tank (AST) with a lid that was probably used to wash car parts. The concrete floors are petroleum stained, which is typical of automobile repair work areas. However, the staining is minimal and there are no floor drains; therefore, it does not represent a likely source of environmental concern to the site. There are four underground storage tanks (USTs) located to the northwest of the former auto repair shop and an inactive oil/water separator located east of Watkins warehouse and offices. The USTs and the oil/water separator are recognized environmental conditions. In addition, there may be additional underground piping and a waste oil UST, based on the site's use.

There is a former truck washing area in the southwestern corner of the Watkins tract. The remainder of the Watkins tract is paved and landscaped. Over 25 trees with diameters greater than 4 inches are located on site. These trees are protected by city ordinance and can only be removed with a waiver. A chain link fence surrounds the facility. Three polemounted transformers appear to be located on the Watkins tract at locations shown on Figure 2. Transformers installed prior to 1978 potentially contain polychlorinated biphenyls (PCBs), which are carcinogenic. There are no labels on the transformers indicating that the transformers have been tested for PCBs. The transformer belongs to South Carolina Electric and Gas Company (SCE&G); therefore, it is our understanding that SCE&G is responsible for any releases from the transformers.

Due to the age of the Watkins development, it is possible that asbestos-containing materials (ACMs) and lead-based paint (LBP) were used during construction. According to DHEC Regulation 61-86.1, an asbestos survey is required by a licensed asbestos inspector to determine the presence or absence of ACMs prior to renovation or demolition of buildings. If ACMs are identified in the building, this could increase the cost of any demolition or renovation to the building. In case of demolition or renovation, the paint or the components containing LBP should be disposed in a municipal solid waste landfill (at a minimum), as opposed to a construction and debris landfill, in accordance with the South

Columbus Street, as shown on Figure 2. The Post and Courier building is located southwest of the site across the railroad tracks. KFC is located north of the site. Residential properties are located west of the site. Light commercial facilities are located northeast of the site, across Meeting Street. The adjacent facilities do not typically handle chemicals of concern; therefore, these facilities do not represent potential sources of environmental concern to the subject site.

An inspection was also performed to identify properties within 500 feet of the site which represent potential sources of impact to the subject site. No properties meeting these criteria were identified.

# 3.0 Public Information Review

This phase of the assessment included an examination of available public documents and interviews with local residents and public officials who might have knowledge of environmental conditions which could potentially impact the subject property. The public information review included an examination of fire insurance company maps, city directories, aerial photographs, and regulatory agency files. The information gathered from these sources was examined for evidence of past uses of the subject site and surrounding properties which could potentially impact the environmental integrity of the subject site. The results of this research are discussed below.

## 3.1 City Directories

City directories are compiled annually for many cities and towns in the United States, listing residents alphabetically by name, address, and telephone number. Each directory is cross-indexed by street address, allowing prior residents or businesses at a site to be determined. City directories for the City of Charleston from 1950 to 2000 were examined in the Charleston County Library for references to the subject site and surrounding properties. Directories from 1961 to 1967 are not available.

The portion of the subject site at 465 Meeting Street was listed as Watkins Motor Lines from 1979 to the present, Packet Motor Express from 1961 to 1978, and the Goodwill Barber Shop and Infinger's Shoe Service from 1950 to 1955. The portion of the subject site located between 33 and 39 Line Street was listed as residential from 1950 to the present.

The following is a summary of present and former occupants of the surrounding sites within a 0.25-mile radius of the subject site which would typically handle chemicals of potential concern.

GENERAL ENGINEERING
PO Box 30712 • Charleston, SC 29417 • 2040 Savage Road • 29407
(843) 769-7378 • Fax (843) 769-7397

- 1971 to 1975 Jung Sing Laundry, 436 Meeting Street
- 1969 to 1985 One Hour Martinizing Dry Cleaning, 441 Meeting Street 1983 to 1986 – B& B Martinizing Cleaning 1987 to 1993 – Pressing Club
- 1968 to 1989 Bennett's Exxon Service Station, 478 Meeting Street
- 1968 Sims Jack Pure Service Station, 492 Meeting Street
- 1950 to 1961 Dukes Gulf Service Station, 509 Meeting Street
- 1955 Murdough Marvin Motors Autos, 510 Meeting Street
   1958 Charleston Auto Sales Used Cars
   1961 Breland Used Cars
- 1950 to 1955 Fort Sumter Chevrolet Used Cars, 620 King Street 1958 – Ace Motor Company Used Cars
- 1961 to the present Nelson Printing Company, 100 Columbus Street
- 1969 to 1989 Stenker HS & Company garage, 101 Columbus Street
- 1958 to the present The Post & Courier, 134 Columbus Street
- 1915 to 1958 A Southern Railroad repair yard, 2-18 Spring Street

According to the likely direction of groundwater flow to the east-northeast, all of the facilities located on Meeting Street, King Street, and 100-101 Columbus Street are downgradient or crossgradient from the site. Therefore, these facilities do not represent potential sources of concern to the subject site. The Post & Courier and the former Southern Railroad repair yard are located upgradient from the site; therefore, they represent potential sources of environmental concern to the subject site.

# 3.2 Sanborn Fire Insurance Company Maps

From the late 1800's to the mid-1900's, the Sanborn Fire Insurance Company mapped industrial areas of cities and towns in the United States where the potential for fire loss was greatest. Sanborn maps for 1888, 1902, 1942, and, 1955 were obtained from Environmental Data Resources, Inc. for the subject site and surrounding properties.

This Sanborn map shows the subject site is residential. A train repair yard is located southeast of the site, across Columbus Street, which is currently The Post & Courier facility. A lumberyard is located southwest of the site, across the railroad tracks. The remaining surrounding properties appear to be commercial and residential.

GENERAL ENGINEERING
PO Box 30712 • Charleston, SC 29417 • 2040 Savage Road • 29407
(843) 769-7378 • Fax (843) 769-7397

- 1902 This Sanborn map shows that the subject site is mostly residential with an ice manufacturing plant located on the southern portion of the site, which is currently The Post and Courier's parking lot. A machine shop is located southeast of the site, across Meeting Street. The remaining surrounding properties appear unchanged from 1888.
- 1942 The subject site appears unchanged from 1902 on this Sanborn map. An auto junk yard is now located at the former location of the lumber yard. The remaining surrounding properties remain unchanged from 1942.
- 1955 This Sanborn map shows a few restaurants, a photo shop, residences, and the ice manufacturing plant on the subject site. The News & Courier, formerly the auto junk yard, is located southeast of the site. The remaining surrounding properties remain unchanged from 1942.

A photo shop was identified on site on the 1955 Sanborn Map; however, this was not confirmed with the city directories. The equipment used in this shop predates typical large photo processing equipment in use today, the shop may also have been a photo gallery. If development was conducted on site, it is likely that any waste developer was discharged to the sanitary sewer. Therefore, this former facility does not likely represent a source of environmental impact.

The city directories indicate an ice manufacturing plant was located on site. This type of facility occasionally handles petroleum to fuel vehicles; however, there is no evidence of this on the Sanborn maps. The city directories also indicate that a former train repair yard and the former auto junk yard were located upgradient from the site. Shallow releases of solvents, petroleum, and PCBs are typically associated with these facilities; therefore, these facilities are considered to be likely potential sources of environmental concern to the site.

#### 3.3 Interviews

Five people were interviewed concerning their knowledge of the history of the subject site and surrounding properties. The persons interviewed are listed below.

- Mr. Hall T. McGee, General Services Manager for The Post and Courier
- Mr. Thomas Fedarick, Operations Supervisor for Watkins Motor Lines
- Mr. Rick Richter, Regional Hydrogeologist with the Trident District office of DHEC
- Chief Donald O'Donald, Charleston Fire Department
- Mr. David Parlman, David Environmental

Mr. McGee stated that the smaller building on the Watkins tract was used as an auto repair garage. He stated that he does not recall any chemical spills on site.

Mr. Fedarick stated that he has been with Watkins Motor Lines for approximately 19 years. He stated that drums are sometimes loaded and unloaded into the warehouse; however, he was uncertain of the contents inside the drums. He stated that Watkins stores motor oil for the trucks. He does not recall any chemical spills on site. He stated that the auto repair building was not used by Watkins but was leased out by Watkins from 1989 to 1990.

Mr. Rick Richter stated that he did not recall any reported spills or releases in the vicinity of the subject site.

Chief O'Donald stated he was unaware of any fires or chemical spills on or in the vicinity the subject site.

Mr. Parlman has been involved in underground petroleum tank installation and removal since 1965. He stated that he remembers the installation of the USTs between 1965 and 1968 at the subject site by Gulf Oil. He stated that the USTs are either 4,000 or 8,000-gallon capacity.

# 3.4 Aerial Photographs

Aerial photographs taken in 1967, 1973, 1981, and 1992 were examined for evidence of practices or conditions which could potentially impact the referenced site. The descriptions of the property as it appears in the photographs are provided below.

- 1967 The subject site at 465 Meeting Street appears to be developed with the present-day building configuration. There are trucks on site, which is consistent with the data provided in the city directories. The subject site between 33 and 39 Line Street appears undeveloped and residentially developed. The Post and Courier building is located southwest of the site, across the railroad tracks. Bennett's Exxon service station is located northeast, across Meeting Street. The Piggly Wiggly is located southeast of the site, across Columbus Street. The remaining surrounding properties appear to be residentially and commercially developed.
- 1973 The subject site and surrounding properties appear similar to the 1967 aerial photograph.
- 1981 The subject site appears similar to its present-day configuration. The surrounding properties appear similar to the 1967 aerial photograph.
- 1992 The subject site appears similar to its present-day configuration. The building is still present at Bennett's Exxon; however, it does not appear to be an active service station. The remaining surrounding properties appear similar to their present-day configuration.

GENERAL ENGINEERING
PO Box 30712 • Charleston, SC 29417 • 2040 Savage Road • 29407
(843) 769-7378 • Fax (843) 769-7397

The subject site has no visible indications of impact in any of the photographs. The former Bennett's Exxon service station is located north of the site, across Meeting Street. Based on the likely groundwater flow direction to the east-northeast, this facility is downgradient from the site. No additional potential sources of environmental impact to the subject site or surrounding properties were identified during examination of the aerial photographs.

## 3.5 State and Federal Records

Through the Freedom of Information Act, DHEC files were reviewed for listings of the subject site and surrounding properties by a subcontracted information service, VISTA Information Solutions, Incorporated (VISTA). The records reviewed included the files of the Groundwater, Wastewater, and Solid and Hazardous Waste Management offices of the Department. In addition to site-specific files, the following DHEC documents, which are updated regularly and accessed through the Internet, were reviewed for reference to the subject site or surrounding properties:

- The State of South Carolina Ground-Water Contamination Inventory This list is DHEC's database of locations where groundwater impact has been documented.
- The State CERCLA Site Inventory List This list includes all sites identified as
  actual or potential federal or state Superfund sites within South Carolina. The list
  was examined for sites which are located within a 1.0-mile radius of the subject
  site.
- The State of South Carolina Landfill List This list identifies all permitted domestic, industrial, cellulosic/construction, and inert waste landfills, as well as sludge and ash monofills. The list was examined for landfills which are located within a 0.5-mile radius of the subject site.
- The Underground Storage Tank (UST) list This list is DHEC's database of sites
  where USTs are registered. The list was examined for USTs which are located
  within a 0.125-mile radius of the subject site.
- The Leaking Underground Storage Tank (LUST) list This list is DHEC's
  database of sites where UST releases have been confirmed. The list was examined
  for LUST sites which are located within a 0.5-mile radius of the subject site.

The subject site is not on any of the state listings, indicating that the on-site USTs are not registered. There is no requirement to register USTs which were out of use by 1974; therefore, it is likely that the USTs are not registered. However, if the USTs still contain product, by definition, they are active USTs and the registration fees are due. Based on information provided by DHEC, a one-time fee for four USTs would total \$5,060. Tank removal costs would be equal to approximately \$1.00 per gallon capacity of the tanks, and

liquid product or wastewater disposal associated with the UST removals would be approximately \$0.75 per gallon after the first 100 gallons. Disposal of the first 100 gallons would be free. If impact is identified, a \$25,000 deductible is required in order to receive cleanup funds from the state underground emergency response bank (SUPERB).

There are two facilities located within 500 feet of the subject site that are identified on the LUST list. However, these facilities are reportedly qualified to receive assessment and cleanup funds from the SUPERB fund or have been issued a letter of No Further Action (NFA), indicating that DHEC does not require any further assessment or cleanup. Therefore, these facilities are not considered to be significant potential sources of environmental degradation to the subject site.

The United States Environmental Protection Agency's (EPA's) listings of sites with potential environmental impact were also reviewed for references to the subject site or nearby properties. These listings include information gathered in cooperation with DHEC, thereby duplicating some of the data contained in the DHEC files. The information in these files was accessed by VISTA through the Internet. The lists reviewed included:

- National Priority List (NPL) The NPL is EPA's database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund program. The status of any NPL site within a 1.0-mile radius of the subject site is evaluated.
- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) - CERCLIS is a compilation of sites which the EPA has investigated or is currently investigating a release or threatened release of hazardous substances as defined by CERCLA. It also includes those CERCLA sites at which the EPA has determined that no further remedial action is required (NFRAP). The status of any CERCLA site within a 0.5-mile radius of the subject site is evaluated.
- Resource Conservation and Recovery Information System (RCRIS) Database The RCRIS Database is a compilation of facilities identified under the Resource
  Conservation and Recovery Act (RCRA) that generate, store, transport, treat, or
  dispose of hazardous wastes. It includes RCRA sites permitted for the treatment,
  storage, and/or disposal (TSD), hazardous waste facilities that are large quantity
  (LQGs) or small quantity (SQGs) generators of hazardous waste, and sites at
  which the EPA is taking corrective action against responsible parties of a RCRA
  site (CORRACTS). The status of any RCRA site within a 1.0-mile radius of the
  subject site is evaluated and the status of any LQG or SQG within 0.125-mile
  radius is evaluated.
- Emergency Response Notification System (ERNS) Database ERNS identifies emergency notifications of chemical releases reported to the EPA since 1992. The status of any ERNS site within a 0.125-mile radius is evaluated.

The subject site is not listed in any of the federal listings. There are two RCRA

GENERAL ENGINEERING

PO Box 30712 • Charleston, SC 29417 • 2040 Savage Road • 29407

(843) 769-7378 • Fax (843) 769-7397

facilities, Roper Hospital at 316 Calhoun Street and MUSC Physical Plant at 171 Ashley Avenue, that are within a 1.0-mile radius, and that have conducted or are currently conducting corrective action. Roper Hospital had a small incinerator that was not properly permitted. It is no longer in use but has not been closed in accordance with the RCRA standards. The MUSC Physical Plant is ranked as a low corrective action priority site; therefore, it is not considered a likely source of environmental impact to the subject site. There are seven facilities on the state priority list that are within a 1.0-mile radius of the subject site. Groundwater flow direction towards the Cooper River has been confirmed at two of these facilities, Charleston Maritime Center and White Stack Maritime Corporation site. All seven of these facilities are downgradient from the subject site; therefore, they do not represent sources of environmental concern to the site.

### 4.0 Previous Site Assessments

A report titled "Property Transaction Environmental Site Assessment" for the U-Haul facility, located south of the subject site at 584 King Street, was performed by General Engineering Laboratories, Inc. (GEL) on January 27, 1992. Since this site is located crossgradient from the subject site, it is not considered a likely potential source of impact to the subject site. Petroleum impacted soil was identified on site.

A report titled "Tank Removal Report" for the News and Courier building (currently The Post and Courier) was performed by GWL, Inc. Environmental Consultants. A 5,000-gallon underground storage tank (UST) containing fuel oil was removed. The analysis of soil samples that were collected during the excavation indicated that there was impact to the soil from petroleum products.

Both of these facilities are located upgradient from the site; therefore, they represent potential sources of environmental concern to the subject site.

## 5.0 Conclusions and Recommendations

This ESA identified potential on-site and off-site sources of environmental concern. Both on-site and off-site sources of environmental concern have been identified. On site, a former auto garage, four underground storage tanks (USTs) near the former garage, a former old truck washing area, and an inactive oil/water separator have been identified. Former and current off-site facilities that handled or handle chemicals of concern have been identified. We recommend collecting soil samples in the on-site areas of concern, and installing three groundwater monitoring wells in order to determine if constituents of concern are present on site.

## **EXECUTIVE SUMMARY**

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

#### TARGET PROPERTY INFORMATION

#### **ADDRESS**

COLUMBUS STREET CHARLESTON, SC 29403

#### **COORDINATES**

Latitude (North): 32.7951000 - 32° 47' 42.36" Longitude (West): 79.9407000 - 79° 56' 26.52"

Universal Tranverse Mercator: Zone 17 UTM X (Meters): 599188.0 UTM Y (Meters): 3628878.2

Elevation: 19 ft. above sea level

#### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property Map: 32079-G8 CHARLESTON, SC

Most Recent Revision: 1994

### TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

### **DATABASES WITH NO MAPPED SITES**

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

### Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 08/19/2011 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

| Lower Elevation                | Address        | Direction / Distance    | Map ID | Page |
|--------------------------------|----------------|-------------------------|--------|------|
| MEDICAL UNIVERSITY OF SC PHYSI | 171 ASHLEY AVE | SSW 1/2 - 1 (0.695 mi.) | 38     | 59   |

## Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/15/2012 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

| Equal/Higher Elevation     | Address         | Direction / Distance    | Map ID | Page |
|----------------------------|-----------------|-------------------------|--------|------|
| EVENING POST PUBLISHING CO | 134 COLUMBUS ST | SSW 0 - 1/8 (0.021 mi.) | 1      | 7    |

### State- and tribal - equivalent CERCLIS

SHWS: State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

A review of the SHWS list, as provided by EDR, and dated 06/21/2012 has revealed that there are 17 SHWS sites within approximately 1 mile of the target property.

## State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Health & Environmental Control's Leaking UST list.

A review of the LUST list, as provided by EDR, and dated 05/23/2012 has revealed that there are 21 LUST sites within approximately 0.5 miles of the target property.

| Equal/Higher Elevation   | Address                                   | Direction / Distance                                  | Map ID     | Page     |

## State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Health & Environmental Control's list: Comprehensive Underground Storage Tanks.

A review of the UST list, as provided by EDR, and dated 05/22/2012 has revealed that there are 17 UST sites within approximately 0.25 miles of the target property.

### State and tribal institutional control / engineering control registries

RCR: The Bureau of Land and Waste Management established this Registry to help monitor and maintain sites that have conditional remedies. A Conditional Remedy is an environmental remedy that includes certain qualifications. These qualifications are divided into two major categories: Remedies requiring Land Use Controls and Conditional No Further Actions.

A review of the RCR list, as provided by EDR, and dated 06/18/2012 has revealed that there are 2 RCR sites within approximately 0.5 miles of the target property.

### State and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Sites from the Department of Health and Environmental Control.

A review of the VCP list, as provided by EDR, and dated 06/18/2012 has revealed that there are 4 VCP sites within approximately 0.5 miles of the target property.

### State and tribal Brownfields sites

BROWNFIELDS: The Brownfields component of the Voluntary Cleanup Program allows a non responsible party to acquire a contaminated property with State Superfund liability protection for existing contamination by agreeing to perform an environmental assessment and/or remediation.

A review of the BROWNFIELDS list, as provided by EDR, and dated 08/16/2012 has revealed that there

are 4 BROWNFIELDS sites within approximately 0.5 miles of the target property.

## ADDITIONAL ENVIRONMENTAL RECORDS

### Local Lists of Hazardous waste / Contaminated Sites

ALLSITES: The South Carolina Department of Health and Environmental Control is pleased to have the Public Record for your review. The purpose of this database is two-fold. First, it will provide to communities another form of notice of cleanup activity, allowing them to have more information about assessment and cleanup activities in their area and in the State. Second, it can assist those seeking to redevelop brownfield properties within South Carolina.

A review of the ALLSITES list, as provided by EDR, and dated 03/02/2012 has revealed that there are 4 ALLSITES sites within approximately 0.5 miles of the target property.

### Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 03/15/2012 has revealed that there are 3 RCRA-NonGen sites within approximately 0.25 miles of the target property.

| Equal/Higher Elevation         | Address         | Direction / Distance     | Map ID | Page |

#### **EDR PROPRIETARY RECORDS**

## **EDR Proprietary Records**

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there is 1

Manufactured Gas Plants site within approximately 1 mile of the target property.

Handler Activities Summary:

U.S. importer of hazardous waste: No Mixed waste (haz. and radioactive): No Recycler of hazardous waste: No Transporter of hazardous waste: No Treater, storer or disposer of HW: No Underground injection activity: No On-site burner exemption: No Furnace exemption: No Used oil fuel burner: No Used oil processor: No User oil refiner: Nο Used oil fuel marketer to burner: No Used oil Specification marketer: No Used oil transfer facility: No No Used oil transporter:

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

SC-EFIS (South Carolina - Environmental Facility Information System) integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina and Maine joined their system in 2004.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all

Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

SC-EFIS (South Carolina - Environmental Facility Information System) integrates information on environmental facilities, permits,

violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina

and Maine joined their system in 2004.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Land type: Private
Classification: TSDF

Description: Handler is engaged in the treatment, storage or disposal of hazardous

waste

Classification: Large Quantity Generator

Description: Handler: generates 1,000 kg or more of hazardous waste during any

calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than

100 kg of that material at any time

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008 Waste name: LEAD

Waste code: U002

Waste name: ACETONE (I)

Waste code: U003

Waste name: ACETONITRILE (I,T)

Waste code: U044

Site Description: Removed SF Alt non-npl status - this site does not meet the threshold criteria (Dawn Taylor 7/2/08) The Calhoun Park Area Site (CPA Site) is located in the City of Charleston, South Carolina on the eastern side of the peninsula. The CPA Site includes the South Carolina Electric & Gas Company (SCE&G) Charlotte Street electrical substation, the former Calhoun Park, and portions of the former Ansonborough Homes property, Ludens Marine, and the National Park Service (NPS) property. EPA is the lead agency for the site, and the South Carolina Department of Health and Environmental Control (SCDHEC) is the support agency. SCE&G is responsible for the site investigation, and remediation costs. EPA is responsible for oversight of SCE&G site investigations and site remedial actions. The current use of the SCE&G property is an electrical substation that contains numerous electrical transformers and associated controls, and supplies electricity to the majority of the Charleston peninsula and other areas within the region. Formerly, the SCE&G property was a manufactured gas plant (MGP). Calhoun Park, a former public recreational park, is now the site of a 1,100-car parking garage operated by the City of Charleston. The Ansonborough Homes portion of the CPA Site is currently occupied by soccer fields on the southern portion and additional development is expected for the remaining northern area. The former Ansonborough Homes housing project was razed during 1996 and 1997 by the City of Charleston. Properties adjacent to the electrical substation have been developed for commercial use. Immediately to the north of the electrical substation, directly across Charlotte Street. the South Carolina State Ports Authority (Ports Authority) operates an inter-modal transportation and storage facility. Bounding the site to the west along Washington Street are rail lines of the Seaboard Railroad. A mixture of light industrial, business and residential uses are present to the west of Washington Street. The Cooper River is approximately 500 feet east of the CPA Site. East of the electrical substation is a former marine supply and boat repair yard owned by J.J.W. Luden's Marine Supply (Luden's). The Luden's property has since been redeveloped as an IMAX theatre, and a new retail/office building has been constructed in the eastern portion of the property. A large area located south of Luden's and east of Calhoun Park is subdivided into three separate properties. The largest parcel is the approximate 3.8 acres of NPS property, which is currently a visitor's center and tour boat docking facility to shuttle tourists to Fort Sumter. The second parcel is an approximate 0.82-acre area owned by the NPS and leased to the City of Charleston for the South Carolina Marine Sciences Museum (City Aquarium), which opened in May 2000. The third parcel is an approximate 0.78-acre parcel formerly owned by George C. Campsen (and presently owned by the NPS) and is a proposed site for a future park area. The Dockside Condominium complex is located to the south of the NPS area and east of the former Ansonborough Homes area. The MGP formerly operated on the northern portion of the CPA Site from approximately 1855 until 1957 by predecessor companies of SCE&G. The physical layout of the former MGP is predominantly situated under the active electrical substation. The MGP was originally operated as a coal-gasification plant but was later converted to a water-gas plant in 1910. In addition, a coal tar and pine pitch refining plant and paint and chemical manufacturer operated on Calhoun Park during the late 1800's. The CPA Site and properties to the east historically consisted of mud flats and marshlands or waterfront, and did not support building structures. Historically, wharves lined the west bank of the Cooper River. Starting in approximately 1700, the area between Washington Street and the current western boundary of the Cooper River was created by the placement of fill. The NPS property was filled during 1940 to 1942 with dredged river material from an unknown source for use by the U. S. Navy. Following World War II, the NPS, Devton and Dockside Condominiums properties were primarily used for ship maintenance and dry-dock repairs. The Luden's building was

Map ID Direction Distance Elevation

Site

**EPA ID Number** 

originally constructed in 1910 as a steam generation plant associated with the water-gas operation of the MGP. The original coal-gasification plant extended eastward to the west portion of the Luden's property, and coal was off-loaded from barges onto a tram extending to the Cooper River. Concord Street was extended from Calhoun Street to Charlotte Street and the three-story building on the Luden's property was constructed on man-made land surrounded to the south and east by a sea-wall. After MGP-associated operations ceased, the Luden's property was primarily utilized as a marine supply and recreational boat repair facility. The original 1910 building structure remains and has been converted into the IMAX theater and retail complex. A Site Screening Investigation was completed by the state in June 1992. The listing of the site on the National Priorities List (NPL) has been suspended based on the present cooperation by SCE&G in performing the required site activities. In January 1993, SCE&G entered into an Administrative Order of Consent (AOC) with the Environmental Protection Agency (EPA) to perform a Remedial Investigation (RI). A Remedial Investigation/Feasibility Study (RI/FS) Work Plan was created in 1993 to characterize site groundwater. Groundwater was also characterized during implementation of the Remedial Investigation (RI) in 1993 and 1994. The groundwater characterization is summarized in the RI Report. Based on that information, EPA determined that additional characterization of the intermediate zone was required, and that a separate Record of Decision (ROD) would be issued to address the intermediate groundwater. During the RI, the city of Charleston began work to relocate an old storm drain which traversed a portion of the site. Because a portion of the storm drain traversing the site was constructed of brick, with deteriorating mortar joints, it was acting in part as a groundwater collection system. Storm water from off-site properties, and portions of the site groundwater, which infiltrated the deteriorating pipe, was discharged into the Cooper River. In order to mitigate this effect, and to prevent the gravel bed required for the replacement pipe from acting in a similar manner, sheet piling was installed between the contaminated shallow aquifer and the location of the new pipe. A groundwater monitoring plan was also established to monitor the effectiveness of the sheet piling in preventing the future infiltration of contaminated groundwater in this area.

Additional investigative activities within the intermediate zone that have been conducted by SCE&G subsequent to completion of the initial RI include the following: groundwater sampling and analyses conducted in 1998; investigation of the Luden's property conducted in 1999; additional characterization of the intermediate groundwater zone conducted in May 2000; confirmational groundwater monitoring activities conducted in August 2000; comprehensive intermediate groundwater monitoring conducted in November 2000; supplemental intermediate groundwater assessment conducted in November 2000; and remedial pre-design characterization activities conducted from June through December 2001. The additional information obtained during implementation of these activities is summarized in the Remedial Investigation/Focused Feasibility Study for the Intermediate Groundwater Zone and the Intermediate Groundwater Interim Status Report. The information has been utilized to develop an updated overall description of the physical characteristics and the nature and extent of constituent impacts within the intermediate zone. Information regarding sediments and surface water at the CPA Site was obtained during development of the RI/FS Work Plan and implementation of the RI in 1993 and 1994. The information is summarized in the RI Report and initial ROD. The nature and extent of potential impacts to the benthic community within the Cooper River was determined during the initial RI by analyses of sediment samples. The analytical results were compared to relevant ecological screening criteria, and indicated that the primary constituents of concern were polynuclear aromatic hydrocarbons (PAHs). Sediment samples with the highest PAH concentrations were clustered in two primary areas: the former Calhoun Street drain outfall and the

Direction
Distance

Site

Elevation

MAP FINDINGS

Database(s)

EDR ID Number EPA ID Number

#### **CALHOUN PARK AREA (Continued)**

1000482228

area adjacent to NPS property. An assessment of benthic macroinvertebrates was also performed on a portion of the Cooper River adjacent to the site. The findings at the close of the initial RI/FS indicated that there were no significant differences between on-site and off-site stations. Surface water samples analyzed during the initial RI were collected from the Cooper River, as well as flood water surrounding the Ansonborough Homes property and storm water outfalls. The analytical results were compared to EPA ambient water quality criteria (AWQC), which indicated that the detected constituents were not above the AWQC standards. Coal tar seeps appeared at the end of Charlotte Street, adjacent to the Cooper River shoreline, following completion of the RI Report and prior to issuance of the original ROD for the CPA Site. Because the seeps represented a new source for potential sediment and surface water impacts, the original ROD proposed that additional investigative activities be conducted and a second ROD subsequently issued, to address sediments and surface water.

Additional sediment and surface water investigative activities conducted subsequent to completion of the initial RI include the following: additional sediment sampling and analyses conducted in June 1997; and sediment and surface water characterization conducted in November and December 1999. The additional information obtained during implementation of these activities is summarized in the RI Addendum Report - Additional Sediment Sampling and the Interim Report on Additional Sediment and Surface-Water Characterization. The information has been utilized to develop an updated understanding of the nature and extent of constituent impacts to sediment and surface water associated with the CPA Site. and to prepare an updated ecological risk assessment. Initial RI/FS activities were conducted pursuant to an Administrative Order on Consent (AOC) between EPA and three respondents: SCE&G, the City of Charleston, and the Housing Authority of the City of Charleston. EPA issued a ROD for the CPA Site in September 1998. Soil and shallow groundwater were addressed in that ROD as Operable Unit 1 (OU#1). A second AOC, effective May 13, 1998, was signed by EPA and SCE&G to facilitate the delineation, excavation and disposal of impacted soils in advance of construction and redevelopment activities at the site. Additionally, mitigation of coal tar seeps located at the end of Charlotte Street was addressed in the May 1998 AOC. A ROD addressing OU1 was completed in September 1998. In January 1999, EPA issued a Unilateral Administrative Order (UAO) to SCE&G requiring implementation of the ROD for OU#1. Since March 1999. EPA and SCE&G have resolved technical disagreements regarding the ROD for OU#1. Concurrently, SCE&G has implemented significant DNAPL removal activities for OU#1 within the shallow zone and conducted additional assessment activities for OU#2. If necessary, an Explanation of Significant Differences (ESD) will be prepared for OU#1 to resolve any significant discrepancies between the ROD and final remediation plans. The ROD for OU#2 was completed September 24, 2002 and is the final remedial action for the CPA site.

Environmental Interest/Information System

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

SC-EFIS (South Carolina - Environmental Facility Information System) integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina and Maine joined their system in 2004.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

SC-EFIS (South Carolina - Environmental Facility Information System)

integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to

support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina

and Maine joined their system in 2004.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

#### STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/07/2012 Source: EPA
Date Data Arrived at EDR: 07/05/2012 Telephone: N/A

Number of Days to Update: 75 Next Scheduled EDR Contact: 10/22/2012
Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date Data Arrived at EDR: 07/05/2012 Telephone: N/A

Number of Days to Update: 75 Next Scheduled EDR Contact: 10/22/2012
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

#### Federal Delisted NPL site list

**DELISTED NPL: National Priority List Deletions** 

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/07/2012 Date Data Arrived at EDR: 07/05/2012 Date Made Active in Reports: 09/18/2012

Data Release Frequency: Quarterly

#### Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Next Scheduled EDR Contact: 10/22/2012 Data Release Frequency: Varies

#### Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

#### Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/15/2012 Date Data Arrived at EDR: 04/04/2012 Date Made Active in Reports: 05/15/2012 Number of Days to Update: 41 Source: Environmental Protection Agency Telephone: (404) 562-8651 Last EDR Contact: 08/16/2012 Next Scheduled EDR Contact: 10/15/2012

#### State and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Sites

Sites participating in the Voluntary Cleanup Program. Once staff and a non-responsible party have agreed upon an approved scope of work for a site investigation and/or remediation, the party enters into a voluntary cleanup contract. Staff oversees the cleanup efforts to ensure that activities are performed to our satisfaction. Upon completion of the negotiated work in the voluntary cleanup contract, the non-responsible party receives State Superfund liability protection.

### ADDITIONAL ENVIRONMENTAL RECORDS

### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

#### Local Lists of Hazardous waste / Contaminated Sites

#### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

#### ALLSITES: Site Assessment & Remediation Public Record Database

The South Carolina Department of Health and Environmental Control is pleased to have the Public Record for your review. The purpose of this database is two-fold. First, it will provide to communities another form of notice of cleanup activity, allowing them to have more information about assessment and cleanup activities in their area and in the State. Second, it can assist those seeking to redevelop brownfield properties within South Carolina.

#### Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 03/15/2012 Date Data Arrived at EDR: 04/04/2012 Date Made Active in Reports: 05/15/2012

Next Scheduled EDR Contact: 12/24/2012 Data Release Frequency: Annually

#### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 09/14/2010 Date Data Arrived at EDR: 10/07/2011 Date Made Active in Reports: 03/01/2012

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

#### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

#### **EDR PROPRIETARY RECORDS**

### **EDR Proprietary Records**

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A

### **OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

## **GEOCHECK®-PHYSICAL SETTING SOURCE ADDENDUM**

#### **TARGET PROPERTY ADDRESS**

POST AND COURIER PROPERTY COLUMBUS STREET CHARLESTON, SC 29403

#### **TARGET PROPERTY COORDINATES**

Latitude (North): 32.7951 - 32° 47' 42.36" Longitude (West): 79.9407 - 79° 56' 26.52"

Universal Tranverse Mercator: Zone 17 UTM X (Meters): 599188.0 UTM Y (Meters): 3628878.2

Elevation: 19 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map: 32079-G8 CHARLESTON, SC

Most Recent Revision: 1994

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

### **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

#### **HYDROLOGIC INFORMATION**

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

#### **FEMA FLOOD ZONE**

FEMA Flood
Target Property County Electronic Data

CHARLESTON, SC YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 4554120022D - FEMA Q3 Flood data

4554120021D - FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

CHARLESTON YES - refer to the Overview Map and Detail Map

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

|        | LOCATION           | GENERAL DIRECTION |
|--------|--------------------|-------------------|
| MAP ID | FROM TP            | GROUNDWATER FLOW  |
| 1      | 1/8 - 1/4 Mile SE  | SE                |
| 3      | 1/4 - 1/2 Mile SSW | Not Reported      |
| 4      | 1/4 - 1/2 Mile NE  | Not Reported      |
| 6      | 1/2 - 1 Mile SSE   | Varies            |
| 7      | 1/2 - 1 Mile South | N                 |
| 10     | 1/2 - 1 Mile SSE   | SE                |
| 14     | 1/2 - 1 Mile NNW   | N                 |
| A16    | 1/2 - 1 Mile South | N                 |
| 35     | 1/2 - 1 Mile SSW   | SSE               |
|        |                    |                   |

For additional site information, refer to Physical Setting Source Map Findings.

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information |          |          |                    |                |              |                     |                    |  |
|------------------------|----------|----------|--------------------|----------------|--------------|---------------------|--------------------|--|

### PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

### HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory Source: Department of Natural Resources

Telephone: 803-734-9494

### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

### **GEOLOGIC INFORMATION**

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

### LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

Water Well Database

Source: Department of Natural Resources

Telephone: 803-734-6440

Water wells in the Coastal Plain counties of South Carolina

Water Well Database

Source: Department of Natural Resources

Telephone: 864-654-1671

A listing of water wells in the Piedmont (upstate) counties.

### RADON

State Database: SC Radon

Source: Department of Health & Environmental Control

Telephone: 864-241-1090 Radon Test Results by Zip Code

Area Radon Information Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor

radon levels.

LINE #14--Mapped per Ward Book

LINE #15--Addison Court now known as Carlson Court

LINE#4--By recital inDeed B127-142 James Morris is the owner of the property and whereas, Elaine Jenkins was, on April 20,1981, duly appointed by the Probate Court of Charleston County as Committee of the property of James Morris (See Probate Court File #81-360) and whereas, Elaine Jenkins as Committee for James Morris, did enter into a Contract with the Evening Post Publishing Company to sell the real property hereinafter described for the consideration. Whereas, as action was brought in the Court of Common Pleas for Charleston County under Case#81-CP-10-2322, seeking permission of and approval for the sale of the subject property pursuant to the terms of the aforesaid contract of sale. Whereas, Honorable Louis E. Condon, Master-in-equity for Chas. County did issue a Final Order dated Oct. 27,1981 authorizing and directing Elaine Jenkins, as Committee of James Morris, to execute and deliver a deed conveying the subject property to Evening Post Publishing Company upon payment of the sum of \$10,000.

| Re: Potential RECs  |                            |                                     |  |  |
| Summary of Communication:   |                            | Conclusions:                        |  |  |
| Mr. McGee of the Evening Post Publishing Co. was interviewed      |                            | No RECs indicated.                  |  |  |
| regarding his knowledge of the Property and surrounding           |                            |                                     |  |  |
| properties. Mr. McGee stated that the                             | ne southeastern parcel of  |                                     |  |  |
| the Property was previously used by                               | Packet Motor Lines, a      |                                     |  |  |
| long-haul carrier and distribution operation for the Post and     |                            |                                     |  |  |
| Courier. The parcel was developed v                               | with two buildings, one of |                                     |  |  |
| which contained 8 high bays for load                              | ing/unloading, as well as  |                                     |  |  |
| offices. The second was a small building used for the             |                            |                                     |  |  |
| maintenance and fueling of trucks. Four USTs for fueling          |                            |                                     |  |  |
| purposes were used in association w                               |                            |                                     |  |  |
| McGee stated that two USTs contained diesel fuel, one             |                            |                                     |  |  |
| gasoline, and he was unsure of the contents of the fourth UST.    |                            |                                     |  |  |
| Mr. McGee stated that Packet Motor Lines used the facility        |                            |                                     |  |  |
| until approximately 1970, at which time the use of the USTs       |                            |                                     |  |  |
| ceased. He stated that the USTs have been filled with sand and    |                            |                                     |  |  |
| to his knowledge, did not leak. He stated that an oil/water       |                            |                                     |  |  |
| separator is still located on the Property, but is not in use.    |                            |                                     |  |  |
| Following Packet Motor Lines this portion of the Property was     |                            |                                     |  |  |
| used by Watkins Motor Lines, but only as a distribution facility. |                            |                                     |  |  |
| No maintenance or fueling of vehicles occurred on the Property    |                            |                                     |  |  |
| during its use by Watkins Motor Lines. After Watkins Motor        |                            |                                     |  |  |
| Lines discontinued use of the Property, the buildings were        |                            |                                     |  |  |
| demolished. The Property is currently leased by a construction    |                            |                                     |  |  |
| company as a laydown/storage area for equipment. Mr.              |                            |                                     |  |  |
| McGee was questioned regarding previously ownership of the        |                            |                                     |  |  |
| Property and stated that the Evening Post Publishing Company      |                            |                                     |  |  |
| conducted extensive title searches and portions of the Property   |                            |                                     |  |  |
| were likely Heirs Property and used for residential purposes.     |                            |                                     |  |  |
| He also stated that he has no knowledge of any spills or          |                            |                                     |  |  |
| releases of chemicals that may have impacted site soils and/or    |                            |                                     |  |  |
